“Our Vision”

Many ask us what business are we in. Most think we are in the business of real estate. The business of 'building'. They are right and wrong too. They are right because we do build some of the most sought after residences and commercial, but that's not all what we do. We think we are in a business to bring smiles. Smiles on the face of thousands of families that find peace and solace in the way we build homes for them, not houses. Smiles from every single corporate for whom we build intelligent office spaces so that they can concentrate on just one thing, business.

Smiles on the face of our employees who work with us, not for us. Smiles for all the contractors, architects, interior designers and masons who sweat with us, always. Smiles on the face of the thousands of shareholders who have entrusted us to grow their wealth. We do not measure our success through the number of stakeholders we satisfy or delight. We measure success through the happiness index. The smiles that we build through opportunity, trust, strength and growth.

Management Discussion and Analysis

Management Discussion and Analysis is an explanation, through the eyes of management, of how an entity has performed in the past, its financial condition, and its future prospects. We have pleasure in submitting hereunder the Management Discussion & Analysis Report on business of the Company. We have attempted to include discussions on the matters to the extent relevant.

ECONOMY SCENARIO:

Financial Year 2014 -2015 was a challenging year for the economies across the world. The Indian economy had its own sets of challenges during the year. At present, the economic space is constrained because of a high fiscal deficit; reliance on foreign inflows to finance the current account deficit; lower savings and lower investment; a tight monetary policy to contain inflation; and strong external headwinds. This led to a slowdown in the overall growth of the economy.

Real Estate sector is not only the biggest contributor to Gross Domestic Product (GDP) of the country but is also one of the largest sectors in terms of Foreign Direct Investment (FDI) inflows in the country. The two main reasons responsible for boom in the real estate industry in India include liberalization of Government policies, which has decreased the need for permissions and licenses before taking up mega construction projects and the expanding industrial sector. Urbanization and increasing household income are some of the major factors that influence demand for residential /commercial property which results in India's economic growth.

However, India is expected to gain back its growth momentum in the medium term owing to higher savings and easing inflationary pressures which would lead to capital formation and fresh investments.

INDUSTRY STRUCTURE AND DEVELOPMENT:

Financial Year 2015 was a year of recovery and positive changes for the Indian economy. The real estate sector, however, continued to face challenges. Tight fiscal spend control by Government, combined with heightened real interest rates had an adverse impact on the savings ability of the population resulting in a continued slowdown in demand for housing and real estate for the second straight year.

During the financial year, the slowdown in the real estate sector was more prominent in the Big Cities. Hence the performance of the real estate sector on the whole has been subdued. Inflation, high real interest rates, high risk weightage for loans to companies operating in the sector, non-availability of

right priced working capital fund, employment growth, time lag during the approval process while launching a project, higher statutory levies, non-availability of skilled manpower, uncertainty of title continue to remain as challenges being faced by the Sector as a whole.

The government has taken several initiatives to encourage the development in the sector, the key ones being:

- Relaxation in the norms to allow foreign direct investment (FDI) in the construction development sector. This move is expected to boost affordable housing projects and smart cities across the country.
- Clearance of model real estate bill by the Union Cabinet.

The Securities and Exchange Board of India (SEBI) has notified final regulations that will govern real estate investment trusts (REITs) and infrastructure investment trusts (InvITs). This move will enable easier access to funds for developers and create a new investment avenue for institutions and high net worth individuals and eventually ordinary investors. Tax efficiency can be critical to the success of REITs. While the basic framework for one-level taxation has been laid down by the Finance (No. 2) Act, 2014 and supplemented by the Finance Bill, 2015, certain challenges persist in structuring a REIT

Demand for residential/commercial property is being driven by India's economic growth. One of the core sub-sectors of residential, commercial, retail and housing, the first category offers maximum promise, while the balance three sectors are also growing well and have a bright future. Residential segments are nowadays hero of the moment due to continues demand.

FINANCIAL PERFORMANCE OVERVIEW:

The real estate sector continued to face challenges posed by the slowdown in the form of subdued demand and slower sales. It is pertinent to note that the end consumers are delaying or deferring their purchase decisions in anticipation of improved market conditions. The prevailing slowdown has also restrained companies from increasing the product prices.

The downward revision of repo rates by Reserve Bank of India has not made any positive impact on the real estate market as the benefits are yet to be passed

onto the end users. Interest rate cuts by banks and financial institutions for home loans and construction finance can aid in revival of demand.

In this backdrop, during the year, the turnover has decreased from ₹ 30,50.41 Lacs to ₹ 8,98.41 Lacs. The Basic Earnings per Share for the year ended 31.03.2015 is 0.33 as against 0.39 for the corresponding previous year ended 31.03.2014.

OPPORTUNITIES & STRENGTHS:

Real Estate plays an important role in the economy. The real estate sector witnessed significant growth over the last 10-15 years however slowdown in last fiscal. The increased business and consequent employment opportunities led to heavy migration to metros which in turn increased the demand for all real estate segments. Real Estate is the second largest employer in the economy. It comprises of four sub-sectors - housing, retail, hospitality, and commercial. While housing contributes to five-six percent of the country's GDP, the remaining three sub-sectors are also growing at a rapid pace, meeting the increase in infrastructural needs. There are various opportunities available in the Infrastructure sectors such as:

- High Domestic Demand for housing.

THREATS, RISKS AND CONCERNS:

In our view, the Indian economy in general and the real estate sector in particular, are well set to thrive over the ensuing decades. Real Estate projects involve agreements that are long-term in nature. All long term projects have inherent risks associated with them and involve variables that may not necessarily be within our control. Accordingly, we are exposed to a variety of implementation and other risks, including inflation, interest rates movements, liquidity, commodity and oil prices, governance, construction delays, material shortages, unanticipated cost increases, demand-supply imbalances government policies and global economic environment which are beyond the control of an individual Company, will dampen the performance of the real estate sector.

Having regard to the slowdown in the real estate market, the Company's sales performance during the financial year was lesser than anticipated. The Company was also hampered by approval delays, which limited its ability to launch new projects and provide a catalyst to the sales momentum.

Following are the risks faced by the real estate sector:

- **Liquidity Risk**
The time required for liquidity of real estate property can vary depending on the quality and location of the property.
- **Regulatory Risks**
The rules, regulations and legalities, demonstration of frequent changes make real estate sector a cumbersome option in India.
- **Transparency Risks**
Being a market with less than 100% transparency, a strong professional valuation and regulatory institutions are needed.
- **Macroeconomics Risks**
Interest rates, inflation and exchange rate risks are amongst the important macroeconomic indicators.

As a part of the overall risk management strategy, the Company consistently insures its assets and generally follows a conservative financial profile by following prudent business practices.

The financial statements have been prepared on an accrual basis and under the historical cost convention.
2.02	Use of estimates
	The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise. Significant estimates used by the management in the preparation of these financial statements include computation of percentage completion for projects in progress, project cost, revenue and saleable area estimates, classification of assets and liabilities into current and non-current, estimates of the economic useful lives of fixed assets, provisions for bad and doubtful debts. Any revision to accounting estimates is recognised prospectively.
2.03	Tangible fixed assets
	"Tangible fixed assets are stated at cost, less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. Borrowing costs directly attributable to acquisition of fixed assets which take substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to be put to use.
2.04	Depreciation and amortisation
	Depreciation on fixed assets is provided on the straight-line method based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013
2.05	Impairment of tangible assets
	The carrying values of assets / cash generating units at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

On initial recognition, all investments are measured at cost. Current investments are carried at lower of cost and fair market value. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.
