A) Statutory Auditors

In terms of the provisions of the section 139 of the Companies Act, 2013, the shareholders have appointed M/s Kothari Kuldeep and Co., Chartered Accountants as Statutory Auditor of the Company for a term of five year from the conclusion of 27th Annual General Meeting till the conclusion of 32nd Annual General Meeting of the Company to be held in the year 2022. Ratification of their appointment from Shareholders at ensuing AGM is not required.

The notes on accounts are self-explanatory with regards to auditors' observations. There were no qualifications, reservations or adverse remarks made by the Auditors for the year under review.

B) Secretarial Auditors

The Board had appointed M/s V.K. Sharma & Company, Practising Company Secretaries, as Secretarial Auditor to conduct the secretarial audit of the company for the financial year 2017-18, pursuant to the provisions of Section 204 of the Companies Act, 2013. The Report of the Secretarial Auditor forms part of the Board's Report as **Annexure 'A'**.

In respect of observations made by the Secretarial Auditors in their Report, it is mentioned that:

1. The company had applied in BSE for listing of 89.05 Lakhs equity shares issued preferentially to the promoter/ promoter group in the year 2008-09 & 2009-2010. The Company had applied for listing within stipulated time and furnished all requisite documents for the listing of the same to the BSE. Regular follow up has been done with BSE, but certain queries were raised by the exchange in the year 2012. The Company has duly provided with the exchange all required clarifications and replies and has even paid the additional listing fees, as demanded by BSE. The matter is pending with BSE for its necessary approval. During the year BSE approved the listing of 59,05,000 shares out of 89,05,000 shares. Listing of remaining 30,00,000 shares is under process with BSE.
2. The Company has appealed against the order of Income Tax Department before the Commissioner of Income tax Appeals, New Delhi within prescribed time limit. However, the Company received the stay order against the demand raised by income tax department from the Hon'ble High Court. The Company's management including its tax advisors believes that its position will likely be upheld in the appellate process whereby it is expected that the matter will be decided in favour of the Company and the demand raised will be dropped by the Appellate Authorities.

The Board at its meeting held on 23.05.2018 reappointed M/s V.K. Sharma & Company, Practising Company Secretaries as Secretarial Auditor for FY 2018-19.

SECRETARIAL AUDIT REPORT
FOR THE FINANCIAL YEAR ENDED ON 31.03.2018**

*[Pursuant to section 204(1) of the Companies Act, 2013 and Rule No.9 of the Companies
(Appointment and Remuneration of Managerial Personnel) Rules, 2014]*

**To,
The Members,
KOTHARI FERMENTATION & BIOCHEM LIMITED**

We have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **M/s KOTHARI FERMENTATION & BIOCHEM LIMITED** (hereinafter called "the Company"). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on our verification of the **M/s KOTHARI FERMENTATION & BIOCHEM LIMITED's** books, papers, minute books, forms and returns filed and other records maintained by the company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, We hereby report that in our opinion, the company has, during the audit period covering the financial year ended on 31.03.2018 complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

We have examined the books, papers, minute books, forms and returns filed and other records maintained by **M/s KOTHARI FERMENTATION & BIOCHEM LIMITED** ("the Company") for the financial year ended on 31.03.2018 according to the provisions of:

- (i) The Companies Act, 2013 (the Act) and the rules made there under;
- (ii) The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the rules made there under;
- (iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed there under;
- (iv) Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings;
- (v) The Following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 ('SEBI Act'):-
 - (a) The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011;
 - (b) The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 1992; and Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015;
 - (c) The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 and amendments from time to time;
 - (d) The Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2014;
 - (e) The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008;
 - (f) The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 regarding the Companies Act and dealing with client;
 - (g) The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2009; and
 - (h) The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998;
 - (vi) Other laws applicable to the Company as per the representation given by the Company.

We have also examined compliance with the applicable clauses of the following:

- (i) The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015;
- (ii) Secretarial Standards issued by The Institute of Company Secretaries of India, with respect to board and general meetings.

During the period under review the Company has generally complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above to the extent they were applicable subject to the following observations:

1. The company had made the applications for listing of 89.05 lacs equity shares to the Bombay stock Exchange (BSE) in the year 2008-09 and 2009-10. The exchange had since granted listing approval for 5905000 equity shares. However trading permission for the same is still awaited for want of confirmation letters from NSDL/CDSL.
2. The Company had applied for delisting of its shares from Calcutta Stock Exchange and completed all formalities in June 2000. However the delisting permission is still awaited.
3. The demand notice from Income Tax authorities for Rs. 665.81 lacs for the A.Y. 2008-09 is still pending in appeal.

We further report that the Board of Directors of the Company is duly constituted with proper balance of Executive, Non-Executive and Independent Directors. There was no change in the composition of the Board of directors of the company during the period of review.

Adequate notice is given to all directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the

meeting and for meaningful participation at the meeting.

On inspection of the minutes as captured and recorded it was ascertained that all the decisions of the Board have been carried through and there were no dissenting views.

We further report that there are adequate systems and processes in the Company commensurate with the size and operations of the Company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines.

We further report that during the audit period there was no specific event/action which has a major bearing on the affairs of the company in pursuance of above referred laws, rules, regulations, guidelines, standards etc.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management of Kothari Fermentation & Biochem Ltd. is pleased to present its Sixteenth Analysis Report covering its overall performance and outlook.

Your company is in the business of Manufacturing Yeast and its derivatives. Various types of Yeasts are produced, e.g. baker's yeast, brewer's yeast, feed yeast, industrial yeast and bio-ethanol yeast. Yeast is used in various end-use applications in the Food, Distillery, Feed, Pharmaceuticals and Other Biotechnology sectors.

Industry Structure and Developments

The Indian Yeast Industry comprises of three major companies which are manufacturing yeast including our company and there is also one small manufacturer producing a small quantity of fresh yeast. Other than us the two major manufacturers are AB Mauri and Saf Yeast. There is increasing demand for yeast and yeast based products from all over the world. The potential for expansion of yeast market in India is very large with country's own demand and export potential from neighboring countries. As one of the largest cane sugar producer country, India has sufficient supply of cane molasses which is the main raw material for yeast industry.

The capital cost of setting up yeast manufacturing plant is very high as practically all equipment is made in high grade stainless steel, power requirement is also very high as large aeration system and large volume of liquids are handled using high power pumps auto-matted control systems, separation and packing systems. Molasses is available round the year but the prices are favourable during the 5 to 6 months of Sugar Mill Production. Also the effluent generated with molasses as main raw material with high BOD and COD effluent requiring complex, elaborate and expensive treatment equipment posing challenges to the yeast industry. Making high quality yeast at low cost to meet continuously changing needs of baking industry, reducing carbon foot print and pollution control are biggest challenges in front of Indian and Global yeast industry.

There has been positive impact of GST implemented during the year on the economy. Your company has fully implemented GST and passed benefits of GST to its customers.

Opportunities and Threats

The growth of yeast market is directly linked to the increasing trend of processed and fast food items, especially bakery items. As per the current trend, India is presently one of the most promising markets for Baker's yeast, as its demand is continuously increasing with the rise in population and changing their eating habits to processed foods.

Due to presence of intense competition, the company is constantly working to enter into new markets, other than Bakeries, and had developed technologies for the manufacturing of Yeast based products needed for Distilleries, Feed, Food Pharmaceuticals and Biotech Industries. The company is being approached by research organizations for developing yeast for their applications.

Segment wise Performance

Manufacturing of Yeast is the only business segment of the Company during the year 2017-2018. The brand names – Kothari "SUNRISE", "KF" and "FOUR SEASONS" have been well established in the domestic market.

The comparison of financial data with previous year's data, is provided as under the heading "Discussion on Financial Performance with respect to Operational Performance".

INDEPENDENT AUDITOR'S REPORT

To The Members of

**Kothari Fermentation & Biochem Limited
Report on the Ind AS Financial Statements**

We have audited the accompanying Ind AS financial statements of Kothari Fermentation & Biochem Limited ('the Company'), which comprise the balance sheet as at 31st March 2018, the statement of profit and loss including the statement of other comprehensive income, the cash flow statement and the Statement of changes in equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation and presentation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with Company (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the Ind AS financial statements in accordance with the Standards on auditing, Issued by the Institute of chartered accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2018, its profit including other comprehensive income, its cash flows and the Changes in Equity for the year ended on that date.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure I, a statement on the matters specified in the paragraph 3 and 4 of the order.
2. As required by Section 143 (3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

Annexure - II to the Independent Auditors' Report -31st March, 2018

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Kothari Fermentation and Biochem Limited ("the Company") as of 31 March 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

2.1 Basis of preparation

The financial statements of the Company comply in all material aspects with Indian Accounting Standards (“Ind AS”) as prescribed under section 133 of the Companies Act, 2013 (“the Act”), as notified under the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India.

The financial statements up to year ended 31st March, 2017 were prepared in accordance with Generally Accepted Accounting Principles (GAAP) in India and complied with the applicable accounting standards prescribed in the Companies (Accounting Standards) Rules, 2014 issued by the Central Government and as per relevant provisions of the Companies Act, 2013 read together with Paragraph 7 of The Companies (Accounts) Rules, 2014.

The financial statements for the year ended 31st March, 2018 are the first financial statements of the Company prepared under Ind AS. The Company followed the provisions of Ind-AS 101 in preparing its opening Ind AS Balance Sheet as of the date of transition i.e. 1st April 2016. Some of the Company's Ind-AS accounting policies used in the opening Balance Sheet differed from its Indian GAAP policies applied as at 31st March, 2016 and accordingly the adjustments were made to restate the opening balances as per Ind-AS. The resulting adjustment arose from events and transactions before the date of transition to Ind-AS were recognized directly through retained earnings as at 1st April, 2016 as required by Ind- AS 101. An explanation of how the transition to Ind AS has affected the reported financial position, financial performance and cash flows of the Company is provided in note.

2.2 Basis of measurement

The financial statements have been prepared under the historical cost convention on accrual basis and the following items, which are measured on following basis on each reporting date:

- Certain financial assets and liabilities (including derivative instruments) that is measured at fair value
- Defined benefit liability/(assets): present value of defined benefit obligation less fair value of plan assets.

2.3 Functional and presentation currency

These financial statements are presented in Indian National Rupee (‘INR’), which is the Company's functional currency. All amounts have been rounded to the nearest Lakhs, unless otherwise indicated.

2.4 Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the financial statements for every period ended is included below:

- Measurement of defined benefit obligations: key actuarial assumptions;
- Recognition of deferred tax assets: availability of future taxable profit against which carry-forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts.
- Useful life and residual value of fixed assets
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources
- Impairment of financial assets: key assumptions used in estimating recoverable cash flows

2.5 Classification of Assets and Liabilities as Current and Non-Current

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset/liability is treated as current when it is:

- Expected to be realised/settled (liabilities) or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realised/settled within twelve months after the reporting period, or
- Cash and cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period or there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other assets/liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of the assets for processing and their realisation in cash and cash equivalents.

2.6 Property, plant and equipment

Recognition and measurement

Items of property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment loss, if any. The cost of assets comprises of purchase price and directly attributable cost of bringing the assets to working condition for its intended use including borrowing cost and incidental expenditure during construction incurred up to the date when the assets are ready to use. In Case of Property Plant and Equipment, The Company has availed the carrying Value as Deemed Cost on the date of Transition i.e. 1st April, 2016.

Capital work in progress includes cost of assets at sites, construction expenditure and interest on the funds deployed less any impairment loss, if any.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as a separate item (major components) of property, plant and equipment. As per the assessment made by the management, fixed assets (other than building and captive power plant) does not comprise any significant components with different useful life. Any gain on disposal of property, plant and equipment is recognised in Statement of Profit and loss.

Subsequent Measurement

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

Depreciation

Depreciation on fixed assets is calculated on Straight Line Method using the rates arrived at based on the estimated useful lives given in Schedule II of the Companies Act, 2013 or re-assessed by the Company on technical basis, as given below.

| Assets | Useful lives as per technical certificate |
|-------------------|---|
| Plant & Machinery | 18 Years (On triple shift basis) |

Depreciation on additions to or on disposal of assets is calculated on pro-rata basis. Leasehold land is not being amortised over the period of lease tenure. Additions on rented premises are being amortised over the period of rent agreement.

Depreciation methods, useful lives and residual values are reviewed in each financial year end and changes, if any, are accounted for prospectively. Individual assets costing below Rs.5000 are fully depreciated in the year of purchase as these assets have no significant useful life.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between net disposal proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss.

Capital work-in-progress

Capital work-in-progress assets in the course of construction for production or/and supply of goods or services or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. At the point when an asset is operating at management's intended use, the cost of construction is transferred to the appropriate category of property, plant and equipment. Costs associated with the commissioning of an asset are capitalised where the asset is available for use but incapable of operating at normal levels until a period of commissioning has been completed.

2.7 Intangible assets

Intangible Assets acquired separately are stated at cost less accumulated amortization and impairment loss, if any. Intangible assets are amortized on straight line method basis over the estimated useful life.

Amortisation methods, useful lives and residual values are reviewed in each financial year end and changes, if any, are accounted for prospectively.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in the statement of profit and loss when the asset is derecognised.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, and whenever there is an indication that the asset may be impaired, impairment loss is recognised in the statement of profit & loss.

2.8 Non-current assets (or disposal groups) held for sale.

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held-for sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. An impairment loss is recognised for any initial or subsequent write-down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset, but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset is recognised at the date of de-recognition.

Once classified as held-for-sale, intangible assets and property, plant and equipment are no longer amortised or depreciated.

2.9 Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication on impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount.

Impairment loss in respect of assets other than goodwill is reversed only to the extent that the assets carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised in prior years. A reversal of impairment loss is recognised immediately in the Statement of Profit & Loss.

2.10 Borrowing Cost

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost

of such assets up to the assets are substantially ready for their intended use. The loan origination costs directly attributable to the acquisition of borrowings (e.g. loan processing fee, upfront fee) are amortised on the basis of the Effective Interest Rate (EIR) method over the term of the loan.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognised in the statement of profit and loss in the period in which they are incurred.

2.11 Foreign currency transactions

Transactions in foreign currencies are recorded by the Company entities at their respective functional currency at the exchange rates prevailing at the date of the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currency are translated to the functional currency at the exchange rates prevailing at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in the statement of profit and loss with the exception that the exchange differences on foreign currency borrowings included in the borrowing cost when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

2.12 Employee benefits

a. Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

b. Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided. The company has following defined contribution plans:

- a) Provident fund
- b) Gratuity

c. Defined benefit plans

For defined benefit retirement plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to the statement of profit and loss. Past service cost is recognised in the statement of profit and loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- Net interest expense or income; and
- Remeasurement

The Company presents the first two components of defined benefit costs in the statement of profit and loss in the line item employee benefits expense.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

d. Other long-term employee benefits

The company has long term employment benefit plans i.e. accumulated leave. The liability for accumulated leave, which is a defined benefit scheme, is provided based on actuarial valuation as at the Balance Sheet date, based on Projected Unit Credit Method, carried out by an independent actuary.

2.13 Revenue Recognition

a. The Company recognises revenue from sale of goods when the titles have been passed at which time all the following conditions are satisfied:

- i) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- ii) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- iii) The amount of revenue can be measured reliably;
- iv) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- v) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sales of goods are recognized at the point of dispatch from factory to customers and sales from Depot are recognized at the time of billing to the customers. Sales are net of returns, rebate, damaged goods and exclusive of taxes.

b. Revenue (other than sale) is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. Export incentives and subsidies are recognized when there is reasonable assurance that the Company will comply with the conditions and the incentive will be received. Claim on insurance companies and others, where quantum of accrual cannot be ascertained with reasonable certainty, are accounted for on acceptance basis

c. Interest other than interest on overdue debts from customers, is recognised on time proportion basis.

2.14 Government Grants and Subsidies

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants that compensate the Company for expenses incurred are recognised in the statement of profit and loss, as income or deduction from the relevant expense, on a systematic basis in the periods in which the expense is recognised.

Government grants relating to the purchase of property, plant and equipment are reduced from Plant, Property and Equipment and are credited to statement of profit and loss on a straight-line basis over the expected lives of the related assets.

2.15 Inventories

i. Inventories are valued as follows:

| | |
|----------------------------------|--|
| Raw materials, stores and spares | Lower of cost and net realisable value. Cost is determined on a weighted average basis. Materials and other items held for use in the production of inventories are not written down below costs, if finished goods in which they will be incorporated are expected to be sold at or above cost. |
| Work-in-progress | Lower of cost and net realisable value. Cost includes direct materials, labour and a proportion of attributable overheads |
| Waste | At net realisable value |

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and to make the sale.

ii. Provision for obsolete/ old inventories is made, wherever required.

2.16 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If the receivable is expected to be collected within a period of 12 months or less from the reporting date (or in the normal operating cycle of the business, if longer), they are classified as current assets otherwise as non-current assets..

Trade receivables are measured at their transaction price unless it contains a significant financing component in accordance with Ind AS 18 (or when the entity applies the practical expedient) or pricing adjustments embedded in the contract.

2.17 Provisions and contingencies, Contingent liabilities and Contingent Assets

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event and it is probable that it is required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation.

A contingent liability is a possible obligation that arises from a past event, with the resolution of the contingency dependent on uncertain future events, or a present obligation where no outflow is probable. Major contingent liabilities are disclosed in the financial statements unless the possibility of an outflow of economic resources is remote. Contingent assets are not recognized in the financial statements but disclosed, where an inflow of economic benefit is probable.

2.18 Measurement of fair value

a. Financial instruments

The estimated fair value of the Company's financial instruments is based on market prices and valuation techniques. Valuations are made with the objective to include relevant factors that market participants would consider in setting a price, and to apply accepted economic and financial methodologies for the pricing of financial instruments. References for less active markets are carefully reviewed to establish relevant and comparable data.

b. Marketable and non-marketable equity securities

Fair value for listed shares is based on quoted market prices as of the reporting date. Fair value for unlisted shares is calculated based on commonly accepted valuation techniques utilizing significant unobservable data, primarily cash flow-based models. If fair value cannot be measured reliably unlisted shares are recognized at cost.

c. Derivatives

The Company uses derivative financial instruments, such as forward currency contracts and interest rate swaps to hedge its foreign currency risks and interest rate risks respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value provided by the respective banks. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss.

2.19 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts and interest rate swaps.

a. Financial Assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Classifications

The company classifies its financial assets as subsequently measured at either amortised cost or fair value depending on the company's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Business model assessment

The company makes an assessment of the objective of a business model in which an asset is held at an instrument level because this best reflects the way the business is managed and information is provided to management.

Financial Assets at amortised cost

A financial asset is measured at amortised cost only if both of the following conditions are met:

- It is held within a business model whose objective is to hold assets in order to collect contractual cash flows.
- The contractual terms of the financial asset represent contractual cash flows that are solely payments of principal and interest.

After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate ('EIR') method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Financial Assets at fair value through Other Comprehensive Income (FVOCI)

Financial Assets with contractual cash flow characteristics that are solely payments of principal and interest and held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets are classified to be measured at FVOCI.

Financial Assets at fair value through profit and loss (FVTPL)

Any Financial Asset, which does not meet the criteria for categorization as at amortized cost or as FVOCI, is classified as at FVTPL.

In addition, the company may elect to classify a financial asset, which otherwise meets amortized cost or FVOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Financial Assets included within the FVTPL category are measured at fair value with all changes recognized in the profit and loss.

De-recognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognize the transferred asset to the extent of the company's continuing involvement. In that case, the company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

On de-recognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI is recognised in profit or loss.

Impairment of financial assets

The Company assesses on a forward-looking basis the expected credit loss associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

With regard to trade receivable, the Company applies the simplified approach as permitted by Ind AS 109, Financial Instruments, which requires expected lifetime losses to be recognised from the initial recognition of the trade receivables.

b. Financial Liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, amortised cost, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of amortised cost, net of directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial Liabilities measured at amortised cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/losses attributable to changes in own credit risks are recognized in OCI. These gains/loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss.

De-recognition of financial liabilities

The company derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

c. Equity Instruments

All equity instruments in scope of Ind AS 109 are measured at fair value. On initial recognition an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. All other Financial Instruments are classified as measured at FVTPL.

2.20 Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in Other Comprehensive Income.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax assets and liabilities are offset only if, the Company:

- a) Has a legally enforceable right to set off the recognised amounts; and
- b) Intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii. Deferred tax

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the balance sheet and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in the statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination. Due to uncertainty, MAT Credit shall be accounted for as and when utilised under the Income-tax Act.

2.21 Leases

Leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases.

Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the percentage value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the

statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Lease in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases.

Payments made under operating leases (net of any incentives received from the lessor) are charged to statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

2.22 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The board of directors of the Company has been identified as being the chief operating decision maker by the Management of the company. The Business activity of the company falls within one business segment viz "Yeast".

2.23 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of twelve months or less.

For the purposes of the Cash Flow Statement, cash and cash equivalents is as defined above. In the balance sheet, bank overdrafts are shown within borrowings in current liabilities.

2.24 Earnings per share

Basic earnings per share is computed using the net profit for the year attributable to the shareholders' and weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the net profit for the year attributable to the shareholders' and weighted average number of equity shares.

2.25 Standards issued but not yet effective

The amendments to standards that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

The Ministry of Corporate Affairs (MCA) has issued the Companies (Indian Accounting Standards) Amendment Rules, 2017 and has amended the following standards:

a. Recent Accounting Pronouncements

On March 28, 2018, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2018, notifying amendments to Ind AS 21, 'The Effects of Changes in Foreign Exchange Rates' and Ind AS 115, 'Revenue from Contracts with Customers.' The amendments are applicable to the Company from April 01, 2018.

b. Amendment to Ind AS 21

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration: On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. The amendment will come into force from April 1, 2018. The Company is evaluating the requirements of the amendment and the effect on the financial statements will be given in due course.

c. Amendment to Ind AS 115

Ind AS 115- Revenue from Contract with Customers: On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Ind AS 115, Revenue from Contract with Customers. The core principle of the new standard is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The standard permits two possible methods of transition:

- i. Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors
- ii. Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach).

The effective date for adoption of Ind AS 115 is financial periods beginning on or after April 1, 2018. The Company is evaluating the requirements of the amendment and the effect on the financial statements will be given in due course.

30 Segment Reporting

According to Ind AS 108, identification of operating segments is based on Chief Operating Decision Maker (CODM) approach for making decisions about allocating resources to the segment and assessing its performance. The business activity of the company falls within one broad business segment viz. "Yeast" and substantially sale of the product is within the country. The Gross income and profit from the other segment is below the norms prescribed in Ind AS 108. Hence, the disclosure requirement of Ind AS 108 of 'Segment Reporting' is not considered applicable.

31 Leases
Operating lease

The Company's significant leasing arrangements are in respect of operating leases of premises for offices and officers' residence. These leasing arrangements, which are cancellable, are typically for a period of 11 months and are usually renewable on mutually agreeable terms. The Company has recognised expense amounting to Rs. 35.45 Lacs (Previous year Rs. 32.54 Lacs)

32 Borrowing Cost

During the year, company has capitalized borrowing cost amounting to Rs. 29.04 Lacs (Previous year Rs.23.94 Lacs). The capitalized rate used to determine the amount of borrowing cost to be capitalized is weighted average interest rate applicable to the entities general borrowing including term loan and working capital during the year is ~ 9.99% (Previous Year ~11.66%).

33 Employee benefits

The Company contributes to the following post-employment defined benefit plans in India.

(i) Defined Contribution Plans:

The Company makes contributions towards provident fund to a defined contribution retirement benefit plan for qualifying employees. Under the plan, the Company is required to contribute a specified percentage of payroll cost to the retirement benefit plan to fund the benefits. During the year the Company has contributed to Government Provident Fund Rs. 27.39 (Previous year Rs. 24.45).

(ii) Defined Benefit Plan:

The Company provides for gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. Gratuity liability is being contributed to the Group Gratuity-cum-life Assurance Cash Accumulation Policy administered by the LIC of India.

The most recent actuarial valuation of plan assets and the present value of the defined benefit obligation for gratuity were carried out as at 31 March 2018. The present value of the defined benefit obligations and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

A. Based on the actuarial valuation obtained in this respect, the following table sets out the status of the gratuity plan and the amounts recognised in the Company's financial statements as at balance sheet date:

D. Actuarial assumptions

The following were the principal actuarial assumptions at the reporting date (expressed as weighted averages).

| | | | |
|-------------------------------|-------|-------|-------|
| Discount rate | 7.75% | 7.50% | 8.00% |
| Expected rate of Return | 7.75% | 7.50% | 8.00% |

| Mortality (% of ILAM 2006-08) | 100% | 100% | 100% |

Assumptions regarding future mortality have been based on published statistics and mortality tables.

KOTHARI FERMENTATION AND BIOCHEM LIMITED

E. Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

| | 31 st March, 2018 | | 31 st March, 2017 | |
|---|------------------------------|----------|------------------------------|----------|
| | Increase | Decrease | Increase | Decrease |
| Discount rate (1% movement) | (15.23) | 17.51 | (15.37) | 17.86 |
| Expected rate of future salary increase (1% movement) | 17.30 | (15.33) | 17.59 | (15.43) |

Sensitivities due to mortality & withdrawals are insignificant & hence ignored. Sensitivities as to rate of inflation, rate of increase of pensions in payment, rate of increase of pensions before retirement & life expectancy are not applicable being a lump sum benefit on retirement. Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

F. Description of Risk Exposures:

Valuations are based on certain assumptions, which are dynamic in nature and vary over time. As such Company is exposed to various risks as follow -

- Salary Increases- Actual salary increases will increase the Plan's liability. Increase in salary increase rate assumption in future valuations will also increase the liability.
- Investment Risk – If Plan is funded then assets liabilities mismatch & actual investment return on assets lower than the discount rate assumed at the last valuation date can impact the liability.
- Discount Rate: Reduction in discount rate in subsequent valuations can increase the plan's liability.

B. Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are:

- recognised and measured at fair value and
- measured at amortised cost and for which fair values are disclosed in the financial statements.

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

Financial assets and liabilities measured at fair value - recurring fair value measurements

| | As at 31 st March, 2018 | | | Total |
|------------------------------------|------------------------------------|---------|---------|-------|
| | Level 1 | Level 2 | Level 3 | |
| Financial assets | - | - | - | - |
| Financial liabilities | - | - | - | - |
| Total financial liabilities | - | - | - | - |

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

There are no transfers between level 1 and level 2 during the year

C. Fair value of financial assets and liabilities measured at amortised cost

| Name of shareholder | As at 31 st March, 2018 | | As at 31 st March, 2017 | | As at 1 st April, 2016 | |
|---|------------------------------------|-----------------|------------------------------------|-----------------|-----------------------------------|-----------------|
| | Carrying Amount | Fair Value | Carrying Amount | Fair Value | Carrying Amount | Fair Value |
| Financial assets | | | | | | |
| Other non-current financial assets | 63.70 | 63.70 | 82.63 | 82.63 | 87.61 | 87.61 |
| Trade receivables | 536.54 | 536.54 | 529.10 | 529.10 | 454.84 | 454.84 |
| Cash and cash equivalents | 77.99 | 77.99 | 60.23 | 60.23 | 31.46 | 31.46 |
| Bank balances other than above | 17.41 | 17.41 | 17.10 | 17.10 | 39.14 | 39.14 |
| Other current financial assets | 1.53 | 1.53 | 0.71 | 0.71 | 1.35 | 1.35 |
| | 697.17 | 697.17 | 689.78 | 689.78 | 614.40 | 614.40 |
| Financial liabilities | | | | | | |
| Borrowings | 1,039.78 | 1,039.78 | 953.40 | 953.40 | 619.65 | 619.65 |
| Other non-current financial liabilities | - | - | - | - | - | - |
| Short term borrowings | 445.11 | 445.11 | 725.10 | 725.10 | 891.28 | 891.28 |
| Trade payables | 345.77 | 345.77 | 399.68 | 399.68 | 200.57 | 200.57 |
| Other current financial liabilities | 233.91 | 233.91 | 431.07 | 431.07 | 307.05 | 307.05 |
| | 2,064.57 | 2,064.57 | 2,509.25 | 2,509.25 | 2,018.55 | 2,018.55 |

The carrying amounts of trade receivables, trade payables, capital creditors and cash and cash equivalents and other bank balances are considered to be the same as their fair values, due to their short-term nature.

The fair values for loans, security deposits were calculated based on cash flows discounted using a current lending rate. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit.

The fair values of non-current borrowings are based on discounted cash flows using a current borrowing rate. They are classified as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs, including own credit risk.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

II. Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- credit risk;
- liquidity risk; and
- market risk

i. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the processes to ensure that executive management controls risks through the mechanism of property defined framework.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed by the board annually to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee oversees compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

ii. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investments in debt securities.

The carrying amount of financial assets represents the maximum credit exposure. The Company monitor credit risk very closely both in domestic and export market. The Management impact analysis shows credit risk and impact assessment as low.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk of the industry and country in which customers operate.

The Company Management has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. The Company's review includes market check, industry feedback, past financials and external ratings, if they are available, and in some cases bank references. Sale limits are established for each customer and reviewed quarterly. Any sales exceeding those limits require approval from the Management of the Company.

More than 60 % of the Company's customers have been transacting with the Company for over four years, and no impairment loss has been recognized against these customers. In monitoring customer credit risk, customers are reviewed according to their credit characteristics, including whether they are an individual or a legal entity, their geographic location, industry and existence of previous financial difficulties

The Company establishes an allowance for impairment that represents its expected credit losses in respect of trade and other receivables. The management uses a simplified approach for the purpose of computation of expected credit loss for trade receivables. The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk of the industry and country in which customers operate.

The carrying amount net of loss allowances of trade receivables is Rs. 536.54 (31 March 2017 – Rs. 529.10, 1 April 2016 – Rs. 454.84).

Ageing of trade receivables are as under:-

| Particulars | Less than 6 months | 6-12 months | More than 12 months | Total |
|------------------|--------------------|-------------|---------------------|--------|
| As at 31.03.2018 | 516.92 | 4.12 | 15.51 | 536.54 |
| As at 31.03.2017 | 520.29 | 5.69 | 3.12 | 529.11 |
| As at 01.04.2016 | 443.19 | 10.44 | 1.21 | 454.84 |

During the period, the Company has made no write-offs of trade receivables, it does not expect to receive future cash flows or recoveries from collection of cash flows previously written off. The Company management also pursue all legal option for recovery of dues wherever necessary based on its internal assessment

A default on a financial asset is when counterparty fails to make payments within 60 days when they fall due.

iii. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are fallen due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, Company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the Company's liquidity position (comprising the undrawn borrowing facilities) and cash and cash equivalents on the basis of expected future cash flows. This is generally carried out at unit level and monitored through caproate office of the Company in accordance with practice and limits set by the Company. These limits vary by location to take into account requirement, future cash flow and the liquidity in which the entity operates. In addition, the Company's liquidity management strategy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

(a) Financing arrangements

The company had access to the following undrawn borrowing facilities at the end of the reporting period:

| | As at | | |
|--|------------------------------|------------------------------|-----------------------------|
| | 31 st March, 2018 | 31 st March, 2017 | 1 st April, 2016 |
| Floating rate | | | |
| Expiring within one year (bank overdraft and other facilities) | 54.89 | 24.90 | - |
| Expiring beyond one year (bank loans) | - | 37.89 | 40.03 |
| | 54.89 | 62.79 | 40.03 |

The bank overdraft facilities may be drawn at any time and may be terminated by the bank without notice. Subject to the continuance of satisfactory credit ratings, the bank loan facilities may be drawn at any time in indian rupee and have an average maturity within a year.

**(b) Maturities of financial liabilities**

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted, and exclude contractual interest payments and the impact of netting agreements.

| | Carrying Amounts | | | Contractual cash flows | | |

The inflows/(outflows) disclosed in the above table represent the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes and which are not usually closed out before contractual maturity. The interest payments on variable interest rate loans in the table above reflect market forward interest rates at the reporting date and these amounts may change as market interest rates change.

iv. Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates and interest rates – will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The Company uses derivatives like forward contracts to manage market risk on account of foreign exchange and various debt instruments on account of interest rates. All such transactions are carried out within the guidelines set by the Board of Directors.

v. Currency risk

The Company has no foreign currency exposure.

Interest rate risk

The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk. During 31st March, 2018 and 31st March, 2017, the Company's borrowings at variable rate were denominated in Indian Rupees.

Currently the Company's borrowings are within acceptable risk levels, as determined by the management, hence the Company has not taken any swaps to hedge the interest rate risk.

Exposure to interest rate risk

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows.

| | Nominal Amount | | |
|----------------------------------|------------------------------|------------------------------|-----------------------------|
| | 31 st March, 2018 | 31 st March, 2017 | 1 st April, 2016 |
| Fixed-rate instruments | | | |
| Financial assets | 81.11 | 80.68 | 102.71 |
| Financial liabilities | - | - | - |
| | 81.11 | 80.68 | 102.71 |
| Variable-rate instruments | | | |
| Financial assets | - | - | - |
| Financial liabilities | 1,617.87 | 1,844.31 | 1,646.97 |
| | 1,617.87 | 1,844.31 | 1,646.97 |

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 50 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

| | Profit or loss | | Equity, net of tax | |
|------------------------------------|----------------|----------------|--------------------|----------------|
| | 50 bp increase | 50 bp decrease | 50 bp increase | 50 bp decrease |
| 31st March, 2018 | | | | |
| Variable-rate instruments | 8.09 | (8.09) | 5.84 | (5.84) |
| Cash flow sensitivity | 8.09 | (8.09) | 5.84 | (5.84) |
| 31st March, 2017 | | | | |
| Variable-rate instruments | 9.22 | (9.22) | 6.17 | (6.17) |
| Cash flow sensitivity | 9.22 | (9.22) | 6.17 | (6.17) |

Fair value sensitivity analysis for fixed-rate instruments

The Company does not account for any fixed-rate financial assets or financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

36 First Time Adoption of Ind AS

As stated in note 2, these are the Company's first financial statements prepared in accordance with Ind AS.

The accounting policies set out in note 2 have been applied in preparing the financial statements for the year ended 31st March, 2018, the comparative information presented in these financial statements for the year ended 31st March, 2017 and in the preparation of an opening Ind AS statement of financial position at 1st April, 2016 (the Company's date of transition). In preparing its opening Ind AS statement of financial position, the Company has adjusted amounts reported previously in financial statements prepared in accordance with Indian GAAP (previous GAAP). An explanation of how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows is set out in the following tables and the notes that accompany the tables.

Exemptions and exceptions availed set out below are the applicable Ind AS 101 optional exemptions and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

A. Ind AS optional exemptions

(i) Deemed cost

Ind AS 101 permits a first-time adopter to elect to continue with the carrying value for all of its property, plant and equipment as recognised in the financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition after making necessary adjustments for de-commissioning liabilities. This exemption can also be used for intangible assets covered by Ind AS 38 Intangible Assets.

Accordingly, the Company has elected to measure all of its property, plant and equipment and intangible assets at their previous GAAP carrying value.

(ii) Leases

Appendix C to Ind AS 17 requires an entity to assess whether a contract or arrangement contains a lease. In accordance with Ind AS 17, this assessment should be carried out at the inception of the contract or arrangement. Ind AS 101 provides an option to make this assessment on the basis of facts and circumstances existing at the date of transition to Ind AS, except where the effect is expected to be not material. The Company has elected to apply this exemption for such contracts/arrangements.

B. Ind AS mandatory exceptions
(i) Estimates

An entity's estimates in accordance with Ind AS at the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at 1st April, 2016 are consistent with the estimates as at the same date made in conformity with previous GAAP. The Company made estimates for Impairment of financial assets based on expected credit loss model in accordance with Ind AS at the date of transition as these were not required under previous GAAP.

(ii) Classification and measurement of financial assets Ind AS 101 requires an entity to assess classification and measurement of financial assets on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

C. Reconciliations between previous GAAP and Ind AS

Ind AS 101 requires an entity to reconcile equity, total comprehensive income and cash flows for prior periods. The following tables represent the reconciliations from previous GAAP to Ind AS.

Reconciliation of equity

*The previous GAAP figures have been reclassified to conform to Ind AS presentation requirements for the purposes of this note.

D. Notes to first-time adoption:

1' Borrowings

Ind AS 109 requires transaction costs incurred towards origination of borrowings to be deducted from the carrying amount of borrowings on initial recognition. These costs are recognised in the profit or loss over the tenure of the borrowing as part of the interest expense by applying the effective interest rate method.

2' Remeasurements of post-employment benefit obligations

Under Ind AS, remeasurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of statement of profit and loss. Under the previous GAAP, these remeasurements were forming part of the statement of profit and loss for the year. As a result of this change, the profit for the year ended March 31, 2017 increased by Rs. 9.84 (Net of Tax Rs. 6.58) There is no impact on the total equity as at 31st March, 2017.

3' Deferred Tax

Under previous GAAP, deferred tax was prepared using income statement approach. Under Ind AS, company has prepared deferred tax using balance sheet approach. Also, deferred tax have been recognised on the adjustments made on transition to Ind AS.

4' Retained earnings

Retained earnings as at April 1, 2016 has been adjusted consequent to the above Ind AS transition adjustments

5' Other comprehensive income

Under Ind AS, all items of income and expense recognised in a period should be included in the statement of profit and loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the statement of profit and loss as 'other comprehensive income' includes remeasurements of defined benefit plans and tax thereon. The concept of other comprehensive income did not exist under previous GAAP.

37 Balances of certain trade receivables, advances, trade payables and other liabilities are in the process of confirmation and/or reconciliation.

38 Segment Reporting

According to Ind AS 108, identification of operating segments is based on Chief Operating Decision Maker (CODM) approach for making decisions about allocating resources to the segment and assessing its performance. The business activity of the company falls within one broad business segment viz. "Yeast" and substantially sale of the product is within the country. The Gross income and profit from the other segment is below the norms prescribed in Ind AS 108. Hence, the disclosure requirement of Ind AS 108 of 'Segment Reporting' is not considered applicable.

39 Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders. The following table summarises the capital of the Company :

| Particulars | 31.03.2018 | 31.03.2017 | 01.04.2016 |
