Dear Sir,

<b>Sub:</b>	<b>Operational Update on trial production at Jonnagiri Gold Project of Geomysore Services (India) Private Limited (“Geomysore” - Associate Company)</b>
<b>Ref:</b>	<b>Disclosure under Regulation 30 of SEBI (Listing Obligations &amp; Disclosure Requirements) Regulations, 2015.</b>

We are pleased to inform shareholders that Geomysore has intimated that its Jonnagiri Gold Project in Andhra Pradesh has successfully completed trial runs through the full processing circuit and all the equipment and process flows have been firmly established. Performance of the plant is as envisaged during feasibility studies.

During the trial, about 40kg of dore bar has been produced. Currently the project is transitioning into commercial production. Eventually refined gold will be produced commercially from the project. This marks a significant achievement as 12 hard years of work for the entire Geomysore team has come to fruition as the Jonnagiri Gold Project is now producing gold.

As the Project continues to ramp up to full production, it will make a significant contribution to India’s domestic production of a metal that so many of us hold dear to our hearts and value as a long-term store of wealth.

By way of background, it may be noted that Geomysore is an associate company of Deccan Gold in which it holds a 27% stake with the major shareholders being Lloyds Enterprises / Thriveni Group.
