IndiGo, Air India Trim Domestic Flights Amid Surge in Fuel Cost

Steeper monsoon cuts may push up fares as airlines grapple with rising operational expenses and a weaker rupee

Arindam Majumder

New Delhi: IndiGo and Air India are reducing domestic flights during the June-August period as higher fuel costs squeeze operations. According to aviation data analytics agency Cirium, Air India and its low-cost arm Air India Express will operate about 20% fewer domestic flights during June and July, while market leader IndiGo is expected to cut flights by 10-12%.

The reductions are likely to push up fares as the two airlines together account for more than 90% of India's domestic aviation market. The June-August period is typically a weak quarter for Indian airlines as it coincides with the monsoon season and a seasonal slowdown in travel demand after the summer holidays.

Airlines usually trim flights during this period to undertake maintenance work. This year, however, the cuts are steeper because of higher jet fuel prices.

Air India had earlier significantly reduced international flights for the June-August period, including suspending services to key US destinations such as Chicago and Newark. "These adjustments are driven by the sustained impact of high fuel prices on overall operations. Air India will continue to monitor demand and operating conditions closely, with a view to restoring frequencies as conditions stabilise," an Air India spokesperson said.

While the government has absorbed 75% of the increase in jet fuel prices, airline executives said the rise was still hurting costs. They also expect a sharper increase in jet fuel prices on June 1 in line with higher petrol and diesel prices.

Global average jet fuel prices rose to \$195.19 a barrel for the week ended March 27 after the US and Israel launched attacks on Iran. Prices have since cooled but were still at \$159.85 a barrel, about 70% higher than February levels.

AI's Delhi-San Francisco Flight Returns After 8 Hours on Mid-Air Snag

Press Trust of India

New Delhi: An Air India flight bound for San Francisco returned to New Delhi on Wednesday after developing a technical snag mid-flight, forcing the aircraft to turn back after spending more than eight hours in the air, according to the airline and flight-tracking data.

Flight AI73, operated by a Boeing 777-300ER with around 250 passengers onboard, departed from Delhi for San Francisco before returning to the national capital in line with standard safety procedures. Air India said in a statement. The aircraft had been airborne for more than three hours and was flying through Chinese airspace when it began diverting back to Delhi, data from flight-tracking website Flightradar24 showed. "The aircraft landed safely and will undergo technical inspection in line with Air India's safety standards", the airline said.

Out-of-Pocket Healthcare Expenses See Sharp Fall as Govt Ups Spending

Teena Thacker

New Delhi: The burden on Indian families paying for healthcare from their pockets has eased significantly over the past decade, with out-of-pocket expenditure falling to 43.4% of total health spending in 2022-23 from 64.2% in 2013-14, according to government data released on Wednesday.

1.48% over the same period. Similarly, GHE's share in general government expenditure has increased from 3.78% to 4.89% over the same period," it said.

In per capita terms what the government spends on each person's health has grown 2.7 times, from ₹1,042 to ₹2,786 over the decade.

The government's share of total health expenditure has also crossed a landmark threshold, rising from 28.6% in 2013-14 to 43.7% in 2022-23. In 2021-22, government health expenditure surged to 1.84% of GDP as the Centre funded emergency Covid response packages and the world's largest vaccination drive. That year, out-of-pocket spending's share of total health expenditure dipped to a record low of 39.4%. The figure has since settled at 43.4% as pandemic-era spending normalised.

The data also points to a wider health financing safety net. Social Security Expenditure covering government health insurance, employee medical reimbursements and social health insurance programmes grew from 6% to 9.9% of total health expenditure between 2013-14 and 2022-23, the government said.

₹2,786

CURRENT PER CAPITA GOVERNMENT HEALTH EXPENDITURE, UP FROM ₹1,042 OVER THE DECADE

"Reducing the burden of OOPPE on households has been a key priority for the government, pursued through various health schemes," the health ministry said.

Data showed public health spending has grown consistently since 2013-14. Government Health Expenditure (GHE) as a share of GDP rose from 1.15% in 2013-2014 to 1.43% in 2022-23. "As per the new GDP series with base year 2022-2023, GHE as % of GDP is

Ebola Scare Ruled Out as Bengaluru Patient Tests -ve

New Delhi: The Pune-based National Institute of Virology (NIV) on Wednesday said that a sample from a visitor from Uganda tested for Ebola Virus Disease is negative.

The outbreak of the disease in the Democratic Republic of Congo and Uganda has been declared a public health emergency by the World Health Organisation (WHO). According to the authorities, the person had reported mild body ache and, as a precautionary measure, was placed under isolation at the state-run Epidemic Diseases Hospital in Bengaluru for observation and evaluation. The individual remained otherwise healthy, they said.

The ministry of health and family welfare, in coordination with state authorities, said it is closely monitoring the evolving Ebola Virus Disease situation in view of recent outbreaks reported in parts of Africa, and is maintaining close surveillance, in accordance with WHO guidelines. "No case of Ebola Virus Disease has been confirmed in India," it said on Wednesday.—Teena Thacker
