SUB: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015 – Launch of iQIS (Intelligent Quantitative Investment Systems) Platform and Participation in Future Alpha 2026 – Quant + Alpha Innovation Expo, New York

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform the Exchange about the following developments relating to TeleCanor Global Limited.

1. Launch of iQIS Platform and Website

TeleCanor Global Limited is pleased to announce the launch of iQIS (Intelligent Quantitative Investment Systems), an artificial intelligence-driven technology platform developed to support quantitative investment research, index design, and systematic investment strategies. In simple terms, the iQIS platform is designed to help financial researchers, asset managers, and institutions analyze financial data, build investment models, and design financial indices using advanced analytics and artificial intelligence tools.

The official website of the platform has been launched and can be accessed at: <https://iqis.us/>

This initiative reflects the Company's continued focus on expanding its presence in the financial technology, artificial intelligence, and data analytics space.

2. Participation in Future Alpha 2026 – Quant + Alpha Innovation Expo

The Company's iQIS division is also scheduled to participate in Future Alpha 2026 – Quant + Alpha Innovation Expo, an international event to be held in New York, USA.

This event focuses on quantitative investing, financial technology, data-driven investment strategies, and innovation in financial markets.

The event brings together professionals from across the financial ecosystem, including:

- hedge funds
- asset managers
- institutional investors
- fintech companies
- quantitative research teams

Participation in such global forums allows the Company to present its technology solutions and interact with professionals from the global financial industry.

During the event, TeleCanor's iQIS division plans to present several modules of its platform, including:

AI Index Foundry

A system designed to help create and manage financial indices using artificial intelligence tools.

AI Powered Factor Index Studio

A research environment that allows analysts to develop factor-based investment indices using machine learning and advanced data analysis.

QIS Risk and Fragility Scanner

A tool designed to analyze potential risks and weaknesses in quantitative investment strategies.

Quant Strategy Operating System

An integrated platform designed to assist in the full lifecycle of quantitative investment strategies, including research, monitoring, and optimization.

Strategic Context

The launch of the iQIS platform and participation in global industry events are part of the Company's broader effort to expand its presence in financial technology, quantitative analytics, and AI-driven financial research tools.

By showcasing its technology in international forums, the Company aims to engage with global industry participants and stay aligned with emerging trends in the financial technology ecosystem.

The above information is being submitted to the Exchange for disclosure purposes in compliance with SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.
