Dear Sir/Madam,

Sub: Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015- Press Release

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are enclosing herewith a copy of Press Release issued by the Company in respect its Rs. 125 Crores MoU with XCMG and addition of 900-Tonne Crane to power next phase of growth for Wind energy expansion.

The press release is also being made available on the website of the Company i.e. www.trishakti.com

Kindly acknowledge and take the same on records.

Thanking You,

Yours Faithfully,
For **Trishakti Industries Limited**

Trishakti Industries Signs ₹125 Cr MoU with XCMG; Adds 900-Tonne Crane to Power Next Phase of Growth for Wind Energy Expansion

Kolkata, India - August 13th, 2026: Trishakti Industries Limited (BSE: 531279), one of India's rapidly growing pure-play infrastructure equipment rental companies, today announced a breakthrough milestone in its growth journey with the signing of a strategic Memorandum of Understanding (MoU) with XCMG for a purchase order valued at approximately ₹125 crore for a 900-tonne heavy-lift crane

The strategic association with XCMG, a global construction equipment manufacturer, provides Trishakti with access to specialized heavy-lifting equipment and supports the Company's strategy of building a modern, high-utilization fleet. The Company believes the addition of a 900-tonne crane can create a new, high-value rental opportunity in wind energy and other large-scale infrastructure applications.

As India's renewable energy sector continues to evolve, the **wind energy industry** is rapidly transitioning towards taller, higher-capacity wind turbines with increased hub heights and larger rotor diameters. This evolution has created demand for a new class of specialized heavy-lift equipment, particularly **900-tonne cranes**, required for the installation of next-generation wind turbines.

Breakthrough Order – Key Highlights

- ₹125 crore – Approximate value of the purchase order associated with the strategic MoU with XCMG
- 900-tonne crane – Specialized high-capacity heavy-lift equipment intended for next-generation wind turbine installation.
- Strategic entry into wind energy – Establishes Trishakti's capability in a specialized, high-barrier equipment category.
- New growth avenue – Expands the Company's addressable market beyond its existing infrastructure, steel, industrial and construction applications

Trishakti has built significant operating traction with a fleet of 150+ machines, 100+ satisfied clients, presence across 25+ industries and 100% fleet utilization. The Company has deployed cumulative capex of more than ₹270 crore through Q1FY27, while its Annual Recurring Revenue (ARR) has reached ₹72 crore+. This combination of fleet scale, customer traction, high utilization and recurring revenue provides a strong foundation for the Company to deploy specialized equipment into emerging high-growth segments.

Industry Outlook :

India's renewable energy transition is creating sustained demand for specialized infrastructure equipment. The wind energy industry is moving towards taller and higher-capacity turbines, increasing the lifting and installation requirements at wind project sites. Trishakti's existing presentation highlights the opportunity created by India's continued investments in infrastructure and renewable energy and identifies specialized heavy-lift equipment as an important area of future growth.

India's wind energy sector presents a significant long-term opportunity, with the installed capacity target highlighted in the Company's existing wind-energy communication expected to increase from approximately 13 GW to 100 GW between FY25 and FY30. Against this backdrop, the availability of high-capacity cranes is expected to become increasingly important for the installation of next-generation wind turbines

Management Perspective :

Mr. Dhruv Jhanwar, Chief Executive Officer of Trishakti Industries Limited, stated, India's wind energy market is witnessing a structural acceleration, with the Government targeting 100 GW of installed wind capacity by 2030 and the sector recording a record 6.1 GW of additions in FY26. As the industry expands at a double-digit pace towards 2030 and turbines become larger and taller, we see increasing demand for specialized 900-tonne-plus lifting solutions, positioning Trishakti well to capture this emerging opportunity

About Trishakti Industries Limited :

Trishakti Industries Limited is a BSE-listed infrastructure equipment rental company engaged in providing specialized heavy equipment solutions for infrastructure, steel, industrial, renewable energy and large-scale construction projects across India. The Company continues to expand its fleet and capabilities to support India's rapidly growing infrastructure and industrial ecosystem.
