Sub: Press Release on Kellton Wins Enterprise Workflow Modernization Mandate from Leading Fortune India 500 Conglomerate to Streamline Financial Operations

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby enclose the **Press Release** titled **“Kellton Wins Enterprise Workflow Modernization Mandate from Leading Fortune India 500 Conglomerate to Streamline Financial Operations”**

Engagement Overview

The platform is intended to consolidate the client's fragmented operational workflows into a single, configurable system. The scope spans financial processing, credit and document lifecycle management, enterprise approvals and governance workflows, and field investigation operations — covering the client's core operational backbone.

The information is also available on the Company's website at www.kellton.com for your reference.

Kindly take the same on record.

**Thanking You,
Yours faithfully,**

For Kellton Tech Solutions Limited

**Rahul Jain
Company Secretary and Compliance Officer

Kellton Wins Enterprise Workflow Modernization Mandate from Leading Fortune India 500 Conglomerate to Streamline Financial Operations

Mumbai, April 20, 2026 — Kellton, an AI-led digital transformation and enterprise technology consulting company, has secured a strategic mandate from a Fortune 500 conglomerate with a major presence in financial services to design, build, and deploy an enterprise-wide internal operations platform using its proprietary **Low-Code/No-Code Platform-as-a-Service (PaaS) framework**.

The platform will unify multiple internal operational workflows into a single configurable system, streamlining key processes across financial operations, credit and document lifecycle management, approvals and governance workflows, and field investigation functions. By replacing fragmented systems and manual dependencies with an integrated digital platform, the engagement is expected to improve operational visibility, process consistency, and enterprise agility.

The engagement underscores Kellton's ability to address large-scale operational modernization requirements in complex, regulated enterprise environments, where speed, configurability, governance, and execution certainty are critical.

Niranjan Chintam, Chairman, Kellton, said: *"This engagement reinforces the strength of our platform-led approach to enterprise transformation. Large organizations in regulated sectors are looking for faster and more adaptable alternatives to traditional custom-built systems, without compromising control, governance, or scalability. Our Low-Code/No-Code PaaS framework enabled us to demonstrate a practical path to modernization with accelerated deployment timelines and enterprise-grade configurability. We believe this engagement reflects a broader market need and strengthens our ability to serve similar transformation mandates across financial services and other regulation-intensive sectors."*

Kellton's proprietary Low-Code/No-Code PaaS framework is a key enabler of the company's platform-led growth strategy. Designed to support workflow-intensive transformation programs, the framework helps enterprises modernize internal operations faster while reducing implementation complexity and improving adaptability to evolving business requirements.

This mandate further strengthens Kellton's credentials in delivering enterprise platforms for operationally intensive and regulated sectors and enhances its ability to pursue similar opportunities where the move toward platformization, along with automation and scalable workflow orchestration, is becoming a board-level priority

About Kellton

Kellton is an AI-led digital transformation and technology consulting company with global delivery capabilities. The company partners with enterprises to build scalable digital platforms, modernize operations, and accelerate intelligent automation journeys. With over 2,000 professionals across North America, Europe, the Middle East, and Asia, Kellton delivers solutions across cloud, data, AI, enterprise platforms, and digital product engineering.
