Aurionpro Launches Fintra: First AI –Native Platform and Operating Layer for Trade Finance

Platform processes Letters of Credit, Bank Guarantees, and Documentary Collections with AI agents at the core and human governance at every decision point

Mumbai, India, April 17, 2026 - Aurionpro Solutions Limited (BSE: 532668 | NSE: AURIONPRO), a global technology company serving the banking and payments industry, today announced the launch of [Fintra](#), an AI-native trade finance platform that uses specialized AI agents to process trade finance instruments, paired with an operating layer designed for human governance at every decision point.

Trade finance remains one of banking's most document-heavy and manual workflows, with the International Chamber of Commerce estimating a 70% rejection rate on first presentation, and an architecture largely unchanged in thirty years. Fintra rebuilds this architecture end-to-end for the future of trade finance. Specialized AI agents handle document processing, compliance screening, clause recommendation, and risk scoring, while bankers focus on judgment, relationships, and governance, with full SWIFT, General Ledger, and limits management integration built in.

The logo for Aurion AI, featuring the word "Aurion" in a bold, black, sans-serif font, followed by "AI" in a similar font. The letter "o" in "Aurion" is replaced by a teal-colored circular icon with a white dot in the center, resembling a stylized 'o' or a network node.

Fintra is the first product built on **Aurion AI**, Aurionpro's AI-native banking software stack combining proprietary domain-specific models, an AI engineering framework, a governed agent runtime, and deep integration with core banking systems. Additional platforms across corporate lending, retail lending, transaction banking, and supply chain finance will follow on this same foundation.

Trade finance cannot afford AI that guesses. Every Fintra decision runs through the Confidence-Gated Handoff Protocol (CGHP), evaluating confidence, materiality, regulatory mandate, and novelty before routing to a human. Every decision is logged and every reasoning chain is fully auditable. Fintra reflects Aurionpro's conviction that the next generation of banking software will not be built by adding AI features to legacy platforms, but by rebuilding the core workflows of the bank on AI-native foundations.

Ashish Rai, Group CEO of Aurionpro Solutions, said:

"For 25 years, we have built mission-critical software for banks. Fintra is the most important product we have ever launched. We started from a blank screen and asked what trade finance would look like if AI agents handled the mechanical work and bankers focused on what they do best. The answer is **Fintra**. Banking software must be reimaged for the age of AI, and we intend to lead that transformation."

Fintra is available immediately for pilot engagements with banks in India, the Middle East, and Southeast Asia.

About Aurionpro Solutions: Aurionpro Solutions Ltd. (BSE: 532668 | NSE: AURIONPRO) is a global enterprise technology leader pioneering intuitive-tech through deep-tech IPs and scalable products. With a strong presence across Banking, Payments, Mobility, Insurance, Transit, Data Centers, and Government Sectors, Aurionpro is setting new benchmarks for AI innovation and impact. Its B2E (Business-to-Ecosystem) approach empowers entire ecosystems, driving growth, transformation, and scale across interconnected value chains.
