SUB: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015 – Successful Oil Discovery and Production at Nandej Field, Gujarat.

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (LODR) Regulations, 2015, we hereby inform that RBM Infracon Limited has successfully drilled and completed two oil wells, NJ#134 (RBM-01) and NJ#135 (RBM-02), in its PEC area at Nandej, Gujarat. The wells, spudded on January 14, 2026, and February 14, 2026, respectively, have encountered hydrocarbon-bearing zones (Kalol-VIII and Kalol-IX) and are currently producing approximately 25 BOPD and 75 BOPD, with a combined peak potential of up to 100 BOPD.

This development marks a significant milestone in enhancing domestic crude production and strengthens the Company's asset value, where it holds a **66% revenue** share under a contract with Oil and Natural Gas Corporation. The Company further plans to drill additional wells to augment production and maximize recovery from the Nandej field.

Performance Report is enclosed herewith as **Annexure I**.

Kindly take the same on your record.

Thanking you,

Yours Faithfully

For, RBM INFRACON LIMITED

JAYBAJRANG RAMAISHISH MANI
Chairman Cum Managing Director

Annexure I: Performance Report

RBM Infracon find Oil at Nandej Field in Gujarat in NJ#134(RBM-01) & NJ#135(RBM-02) Wells @100 BOPD

RBM Infracon Limited has drilled 2 Wells in their PEC area Nandej. The first well **NJ#134 (RBM-01)** was spudded on 14th Jan 2026, and Second Well NJ#135(RBM-2) was spudded on 14th Feb 2026. Well, they were successfully drilled and completed. Presently, both these well produced have been successfully drilled and completed demonstrating peak production potential of up to 100 barrels of oil per day, strengthening domestic crude output and future field development plan.

The NJ#134(RBM-01) well reached a total depth of 1763 meters, encountering 02 distinct hydrocarbon-bearing sand intervals: **Kalol-VIII & Kalol-IX**. Currently, the well is producing @25 BOPD during the testing phase from the Kalol-IX, with optimization further expected to drive rates higher and other Well NJ#135(RBM-02) drilled to 1750 meters and encountered. 2 hydrocarbon bearing zones Kalol-VIII and Kalol-IX and producing 75 BOPD and presently producing.

Strategic Asset Development in Gujarat

This enhancement in production marks a pivotal moment for the Nandej field, where RBM Infracon holds a **66 % revenue share** under a Revenue Sharing Contract with ONGC. The success of the NJ#135(RBM-02) well exceeds initial estimates, and therefore, RBM is planning drilling of additional wells to produce more to add maximum extent of the oil pool.

Economic Impact & Pricing Realization

- **Market Linked Crude Pricing:** Under PEC, Crude oil from the Nandej field is supplied to ONGC with pricing linked to the **international market**, ensuring market-aligned revenue realizations.
- **Domestic Production Growth:** This enhancement of Crude with immediate incremental domestic production increase for RBM and ONGC.
- **Consolidation Synergy:** This drilling of well coincides with RBM's ongoing plans for enhancing operational visibility and production capacity.
- **Executive Commentary**

"We are encouraged by the results of the NJ#134(RBM-1) and NJ#135(RBM-2) wells, which are better than our initial estimates. Recoverable reserves and production from the Nandej field are expected to increase significantly. This enhancement underscores our focus on disciplined, low-cost resource [development](#) for production enhancement capacity"

—**JB Mani**, Managing Director, RBM Infracon.
