## PRESS RELEASE

### **MethodHub plans major Global Capability Centers (GCC) push, plans nearshore expansion in Mexico and Costa Rica to support current and future customers.**

*Expansion strengthens same-time-zone support for North American enterprises and Global Capability Centers through regional talent, multilingual expertise, and scalable technology services.*

**Bengaluru, June 10, 2026:**

**MethodHub Software Limited** is planning to set up nearshore operations in Guadalajara, Mexico and San Jose, Costa Rica to offer same time zone services to leading customers and prospects in the US and Canada, besides multilingual support. “For MethodHub, this isn't simply geographic diversification—it's a deliberate capability investment” said **Aho Bilam, CEO and Executive Director, MethodHub**.

**MethodHub** has also launched the QuantumHire portal to focus on full time hiring. This is focused on GCCs and would play well with the new Central American push to grow the company’s footprint and customer wallet-share. It would also help MethodHub participate in a more integral way with the customers’ resourcing plan.

“India has been central to our offshore strategy, but of late, we have customers asking for same time zone development and L3 support. We have seen this marked need to get high end resources to enable scrum/vibe development processes and provide critical technical support during the eastern afternoon and most of the Pacific business hour windows. This necessitated a central American strategy for same time zone support. After looking at various options, we finalized on Mexico and Costa Rica” said **Aho Bilam**.

"From a delivery standpoint, these centers fundamentally change what we can promise and how we execute. The talent base in Mexico and Costa Rica is something we need to cultivate as we tap into. We have a good number of exceptional engineers with strong technical depth, professionals who understand enterprise-scale complexity, and teams that communicate effectively with business stakeholders. This expansion is not a cost play; it's a capability play” said **Lok Dodla, Chief Delivery Officer, MethodHub**.

“Finding local talent and scaling the team to support our customers sustainably has always been our highest priority. With 4 location options in India, we now add 2 Central American locations to align with our customers’ GCC and offshore/nearshore strategy, said **Karthik Leelasankar, COO, Methodhub**.

#### **About MethodHub:**

**MethodHub Software Limited (BSE: [METHODHUB | 544637](#))** is a global, AI-centric software services company with operations in the US, India, Canada and Thailand with firm plans to expand into Mexico and Costa Rica.
