Subject: Press Release

Dear Sir/ Madam,

Please find enclosed Press Release titled “CleanMax Expands Its Footprint in Rajasthan to Decarbonize Industrial Operations; Partners with Sangam India Limited for 30 MWp Solar and 20 MW Wind Hybrid Renewable Project” to be issued by Clean Max Enviro Energy Solutions Limited.

The same will be made available on the Company’s website www.cleanmax.com.

This is for your information, record, and appropriate dissemination.

Thank you.

Yours faithfully,

For Clean Max Enviro Energy Solutions Limited
(Formerly known as Clean Max Enviro Energy Solutions Private Limited)

CleanMax Expands Its Footprint in Rajasthan to Decarbonize Industrial Operations; Partners with Sangam India Limited for 30 MWp Solar and 20 MW Wind Hybrid Renewable Project

Highlights

- CleanMax to supply round-the-clock power with 30 MWp solar and 20 MW wind power, and 2 MWh BESS capacity to Sangam India Limited, one of India's most prominent and fully integrated textile manufacturers
- This marks CleanMax's continued expansion in Rajasthan, with 525 MW of commissioned renewable energy capacity in the state (as of March 31, 2026)
- CleanMax has ~5.7 GW of contracted renewable energy sale capacity, of which ~3.1 GW is commissioned (as of March 31, 2026)

India, April 15, 2026: Clean Max Enviro Energy Solutions Limited (NSE: CLEANMAX | BSE: 544717) ("CleanMax"), India's largest renewable energy solutions provider for the commercial and industrial sector, has announced a partnership with Sangam India Limited to decarbonize its operations across Rajasthan. Sangam India Limited is the flagship textile entity of the Sangam Group, headquartered in Bhilwara, Rajasthan.

The collaboration includes the signing of a hybrid renewable energy supply agreement to deliver 30 MWp of solar and 20 MW of wind power, augmented with a 2 MWh Battery Energy Storage System (BESS), to five Sangam facilities across Rajasthan. The power will be supplied from CleanMax's Bhikamkor hybrid farm under an intra-state group captive structure, marking a key milestone in its national expansion strategy.

Across Rajasthan, CleanMax has developed renewable energy projects at locations including Bhikamkor and Bikaner. As of March 31, 2026, the company has 525 MW of operational capacity in the state, supporting a diverse base of corporate and industrial customers.

These initiatives serve a range of customers across sectors such as technology, manufacturing and data centres, reflecting CleanMax's ability to deliver scalable and reliable renewable energy solutions for energy-intensive operations.

Rajasthan's high solar irradiation and strong wind potential make it a natural hub for hybrid renewable development. By combining solar and wind generation with storage, such projects enable a more stable and predictable supply profile across day-night cycles.

By supplying renewable power to Sangam's textile facilities, CleanMax is supporting the decarbonization of the manufacturing sector while delivering reliable energy. The project aligns with Rajasthan's progressive regulatory framework, led by the Rajasthan Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025 which streamline open access procurement, and enable hybrid renewable projects with storage. The framework facilitates the integration of storage solutions, supports reliable and scalable adoption of clean power by industrial consumers.

Mr. Kuldeep Jain, Managing Director, Clean Max Enviro Energy Solutions Limited, said, *"Our expansion into Rajasthan marks an important milestone in CleanMax's national expansion. This*

Value through values

reflects our long-term growth strategy of building high-quality projects across key industrial clusters. The partnership with Sangam India Limited strengthens our geographic and customer portfolio with round-the-clock power.”

He further added, “*We remain focused on supporting commercial and industrial consumers with clean power solutions that drive both sustainability and long-term business value.”*

Mr. S.R. Dakhera, Chief Financial Officer Sangam India Limited, said, “*With a global footprint, for a manufacturing-led business like ours, operations and sustainability must move in tandem. As a group, we aim to become one of the most sustainable companies in the Indian textile sector. Further, as a GRS (Global Recycled Standard) certified company we have been strategically shifting our focus on being an environment-friendly conglomerate encouraging sustainability in the Indian Textile industry. This collaboration with CleanMax allows us to access hybrid renewable energy backed by storage, supporting stable operations across multiple facilities while advancing our long-term decarbonization roadmap.”*

Through projects such as this, CleanMax reinforces its position as a trusted net-zero transition partner, supporting energy-intensive industries in moving toward decarbonization.

About Clean Max Enviro Energy Solutions Limited:

CleanMax (NSE: CLEANMAX | BSE: 544717) is India’s largest renewable energy company for the Commercial and Industrial sector, across India, the Middle East, and South-East Asia as of March 2026.

Focused on being the sustainability & net-zero partner choice for corporates, CleanMax provides diverse solutions, including rooftop solar projects, utility-scale solar farms, wind farms and wind-solar hybrid farms to its customers, and has further expanded its portfolio to include carbon credit solutions as well. CleanMax holds a leading position with the largest customer base amongst C&I renewable energy players in India with 570+ customers, and data centers and AI accounting to 42% of contracted volumes as of Q3 FY26.

CleanMax’s solutions are aimed at helping accelerate its customers’ shift to clean energy. Companies across industries such as data centers, AI and technology, cement, steel, industrial manufacturing, FMCG, pharmaceuticals, real estate and global capability centers have relied on CleanMax as their Net Zero Solutions provider.

About Sangam (India) Limited:

Sangam India Limited is one of India’s most prominent and fully integrated textile manufacturers, operating a robust, end-to-end textile ecosystem across six world-class manufacturing facilities in Rajasthan. The company’s seamless integration from spinning precision yarns to weaving premium fabrics and manufacturing garments, provides strong control over quality, consistency, and cost efficiency, while enabling rapid response to evolving fashion trends.

In parallel, Sangam India remains committed to ESG-led manufacturing, with a strong focus on energy efficiency, waste reduction, and ethical workforce practices across its operations. This integrated approach combining operational excellence with sustainability positions the company as a resilient and responsible player in the global textile value chain.
