INTERNAL RISKS FACTORS

Business Specific/ Company specific Risk

1. ***Our revenue from operations has significantly increased from ₹ 517.17 Lakhs in FY 2022-23 to ₹ 1,017.16 Lakhs in FY 2023-24 and to ₹ 1,319.23 Lakhs in FY 2024-25 resulting in CAGR of 36.64% over the last 3 fiscal years. Similarly, our profits have significantly increased from ₹ 93.86 Lakhs in FY 2022-23 to ₹ 346.62 Lakhs in FY 2023-24 and to ₹ 419.15 Lakhs in FY 2024-25 resulting in CAGR of 64.68%. If we are unable to sustain or manage our growth rate our business operations and results of operations may be adversely affected, and this rate of growth may not be achievable in the future.***

   We have experienced growth in the past years. The details of certain of our financial parameters showcasing this growth over the last three Fiscal Year ended on March 31, 2025, 2024 and 2023 has been set out below:

   (Amount in Lakhs)

Particulars	March 31, 2025	March 31, 2024	March 31, 2023	CAGR
Revenue from Operations	1,319.23	1,017.16	517.17	36.64%
EBITDA	616.06	491.24	145.89	61.63%
Profit for the year after tax	419.15	346.62	93.86	64.68%

   Our growth requires us to continuously invest in our operations, evolve and improve our operational, financial, and internal controls and administrative infrastructure. We may not be able to sustain our growth due to a variety of reasons, including but not limited to, the following:

   - maintaining high levels of quality control and cost-effective supply of services and customer satisfaction;
   - recruiting, training and retaining sufficient skilled management and technical personnel for our service process;
   - developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
   - making accurate assessments of the resources;
   - adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
   - strengthening internal control and ensuring compliance with legal and contractual obligations;
   - Managing relationships with customers, suppliers and lenders.

   A failure to sustain our growth may have an adverse effect on our business, financial condition, results of operations and future prospects. We are embarking on a growth strategy which involves deepening, diversifying, and expanding our customer base by tapping into new markets and focusing on operational efficiencies to improve returns and pursuing strategic alliances and

inorganic growth opportunities. Such a growth strategy will place significant demands on our management as well as our financial, accounting, and operating systems. We cannot assure you that our future performance or growth strategy will be successful.

Further, as we scale up and diversify our products, we may not be able to execute our operations efficiently, which may result in delays, increased costs, and lower quality products. Further, if we are unable to scale our operations, we may not be able to successfully execute our growth strategy. Our failure to manage our growth effectively may have an adverse effect on our business, financial condition, results of operations and future prospects.

2. ***Our business will suffer if we fail to anticipate and develop new services and enhance existing services to keep pace with rapid changes in technology and the industries on which we focus.***

The Information Technology market is characterized by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

For further details of our Business, please refer to chapter titled ***"Our Business"*** beginning on page 146.

3. ***Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.***

From time to time, our customers require our customer support team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

The sale of our services is highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial condition.

4. ***We have not been granted the patent application filled in respect to Zerotouch technology and is still under examination by Indian Patent Office. Any failure to obtain such patent might lead to loosing of competitive advantage of our company and can adversely affect our business.***

We are a Software as a Service (Saas) Company and has been engaged in developing software and technologies for our clients. To secure our products from privacy and duplication, we get them patented. For details of products and technologies patented by our company, please refer to section titled ***"Intellectual Property Related Approvals"*** in Chapter titled ***"Government and Statutory Approvals"*** on page 297.

We have filed a patent application on July 08, 2024 for our ZEROTOUCH technology under application number **202421052179**, which is currently under examination by the Indian Patent Office. As of the date of this Red Herring Prospectus, we do not hold a granted patent for this technology. There is no assurance that our patent application will be granted, either in full or in part. If our application is rejected, we would not have exclusive legal rights to prevent others from using similar or related technology.

Since we do not currently have a patent in force, our ZEROTOUCH system is not protected by statutory intellectual property rights, which exposes us to the risk that other entities may develop, use, or commercialize technologies similar to ours. Although there will be no restriction on our company to use ZEROTOUCH without its patent however we may not be able to take effective legal action to prevent other entities who may develop, use or commercialize technology similar to us. This may result in increased competition and may affect our profit margins and marketing expenditure. At present our technology is in final development and final implementation stage with no revenues are being generated, rejection of the patent will adversely impact the projected revenue stream of our Company in the future.

We continue to rely on internal confidentiality practices and other safeguards to protect elements of our system; however, in the absence of a granted patent, such measures may not fully mitigate the risks of imitation or misappropriation.

5. ***There have been certain inadvertent inaccuracies, delay and non-compliances with respect to certain regulatory filings and corporate actions taken by our Company. Consequently, we may be subject to regulatory actions and penalties for any past or future non-compliance and our business and financial condition may be adversely affected.***

Further, the company has made the following non-compliances while filing the Forms with ROC:

1. On 14.03.2016 Company has acquired wholly owned subsidiary company Infinity Infoway GMBH as per AOC-1 attached with Form AOC-4. The company has mentioned the details of subsidiary in AOC-4 and MGT-7 for the FY 2015-16. From FY 2016-17, the company has mentioned in AOC-4 that it has no subsidiary while in Directors Report it has mentioned that it has subsidiary company.
2. From FY 2016-17 up to FY 2019-20, the company has filed MGT-7 and not disclose about the subsidiary company while in Directors Report it has mentioned that it has subsidiary company. Form FY 2020-21, the company has filed wrong Form MGT-7A instead of MGT-7 not mentioning the details of subsidiary company.
3. Up to 2020-21, the company has mentioned in Directors Report that it has subsidiary company but not mentioned the same in AOC-4. From FY 2021-22, the company has mentioned in the Directors Report that it has no subsidiary company.
4. The company has attached the annual accounts and Board Report of Bitlogic Infoway Private Limited with the Form AOC-4 of Infinity Infoway Pvt. Ltd. Therefore, the company has not filed the Annual Accounts and Directors Report for the FY 2019-20.

We have filed the necessary forms after paying the required additional fees and following these submissions, the regulatory authorities approved the delayed filings. As on the date of the filing of this Red Herring Prospectus, we have not been subject to adjudication, as we have not received any show-cause notices or adjudication orders from the Registrar of Companies (ROC) till date. Furthermore, the delays were regularised by us by making the necessary filings along with the applicable additional fees, which were paid as prescribed under the relevant provisions of the Companies Act and applicable rules. As such, no further proceedings or penalties have been initiated against us in this regard.

Further to prevent such issues in the future and ensure better compliance, our company has proactively appointed a dedicated compliance officer. Bhartiben Girdharbhai Ajudiya was appointed as the company secretary and compliance officer in August 2024 to help reduce instances of non-compliance and delayed filings.

However, these delays did not result in any material disruptions to our day-to-day operations or have a significant adverse impact on our financial performance, it is important to note that any future penalties, fines, or regulatory actions related to non-compliance or late filings could negatively affect our operations and financial position. Such actions could lead to reputational damage, loss of investor confidence, and potential financial liabilities. Further, there is no assurance that such discrepancies will not occur in the future, and we may still be subject to regulatory actions or penalties, which could adversely affect our business operations and financial position.

6. Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability

We operate in a competitive industry that experiences rapid technological developments, and changes in customer requirements. Our competitors include the big E-Learning and Global System

Integrators, in addition to some mid-sized, and several smaller local competitors in the various geographic markets in which we operate.

We may face competition from companies that grow in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, and lowering our gross margin percentage.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to issue services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors.

For further details of our Business, please refer to chapter titled "***Our Business***" beginning on page 146.

7. We are dependent on and derive 63.44%, 83.47% and 71.45% of our revenue from our top 10 key customers for the Fiscal Year 2025, 2024 and 2023 respectively. Delay or Cancellation of orders by any one or all of our top customers could have a material and adverse effect on our business, results of operations and financial condition.

We depend on a limited number of customers, which exposes us to a high risk of customer concentration. Our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

The table below sets out our revenue from our largest customer, the top 5 customers and top 10 customers, on the basis of revenue contribution, for the fiscal year ended March 31, 2025, 2024 and 2023:

(Amount in Lakhs)

Particulars	As on March 31, 2025		As on March 31, 2024		As on March 31, 2023	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
Largest Customer	303.00	22.97%	249.86	24.56%	131.21	25.37%
Top 5 Customers	639.92	48.51%	672.27	66.09%	303.34	58.65%
Top 10 Customers	836.86	63.44%	849.03	83.47%	369.51	71.45%

Any decline in our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We cannot assure you that the customers which contribute to a major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fails to fulfil their respective obligations, our business, financial condition and results of operations will be adversely affected. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

8. ***One of the Objects of the Issue is to use the Net Proceeds to invest up to ₹ 375 Lakhs towards the development a new product called ZEROTOUCH DaaS (Device as a Service) specified in the "Objects of the Issue – Development of the Product ZEROTOUCH DaaS" which is subject to a variety of risks related to the non-completion of various stages as outlined in the schedule of implementation of Proposed project as specified on page 93. Delays or failures in completing any of the milestones in the schedule of implementation could adversely affect the overall project completion and subsequent operations.***

   Our company intends to invest **₹ 375.00 Lakhs** toward the development of a new DaaS (Device as a Service) product known as ***"ZEROTOUCH".*** Through this product we aim to the challenges associated with traditional confidential document printing for the examination process and its new product offering will provide a no touch plan it will outline several strategic solutions which will significantly improve the security and efficiency of confidential document management, creating a more reliable and effective workflow.

   We required to complete the Proposed project within the timelines as specified in the schedule of implementation of Proposed project. During the course of next 2 years, we can face many problems and disruption like employee shortage, software and hardware glitch, power shortage etc. could impede progress and may delay the implementation timeline of the project. Delays could arise from unforeseen technical challenges, equipment malfunctions, or quality control issues as well. Such delays may necessitate additional testing, rework, or adjustments, potentially postponing the commencement of commercial implementation of the project. It is essential to closely monitor the project schedule and manage risks associated with each stage to ensure timely project completion and minimize potential disruptions. Failure to meet these timelines could result in increased project costs, potential revenue loss, and strained relationships with investors and a delayed start to commercial operations could impact revenue generation, market entry timing and our competitive positioning.

9. ***Failure to continue investing in Research and Development (R&D) activity may harm our business growth.***

   Our company is engaged in the business of providing various kinds of ERP solutions to multiple educational institutes and industries across India. With the rapid changes happening in the IT industry due to introduction of new technologies, software, hardware or change in the government policies or regulations etc., it is essential for us to continue to invest in the research and development of our ERP software to be aligned with the changing industry trends. For example, with the change in the New educational policy in year 2020, our company started the R&D activities to develop a new ERP software specifically for schools and universities across India which provided a unique proposition to our customers to store, access and analyze data in a better way.

   Considering the importance of R&D activities in our operations and business, we have been continuously investing in R&D and related activities. This requires an extensive amount of capital and human effort in addition to other resources. Although our company has not faced any issues till date, however, we cannot assure the potential investors that we shall be able to invest continuously or at all in R&D activities in coming years as we are presently doing. This may have an adverse effect on our growth and impact our business adversely.

10. ***Our Company requires significant amounts of working capital for continued growth. Our inability to meet our working capital requirements may have an adverse effect on the results of operations. Further, failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.***

    Our business is working capital intensive and requires a significant amount of working capital for smooth functioning. Summary of our working capital position based on the audited standalone financial statement is given below:

As per audited standalone financial statements of our company and certified by our statutory and peer review auditor M/s. Keyur Shah and Associates, chartered accountants through CA certificate dated July 28, 2025

A significant portion of our working capital is utilized towards trade receivables. As on March 31, 2025, March 31, 2024, and March 31, 2023, our trade receivables form 61.54%, 83.39% and 82.94% respectively, of our total current assets (other than cash and bank balances) based on restated financial statements.

We intend to continue growing by expanding our business operations. This may result in an increase in the quantum of current assets, particularly trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sources of funds, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and the result of our operations. For further details regarding working capital requirement, please refer to the chapters titled ***"Objects of the Issue"*** and ***"Management Discussion and Analysis of Financial Condition and Results of Operation"*** beginning on pages 92 and 264 respectively.

11. Termination, Non-Execution or Non-renewal of 38 material agreements with our clients or any material modification to the existing terms under such agreements, adverse to our interest, will materially and adversely affect our ability to continue our business and operations and affect our future financial performance.

We specialize in providing ERP (Enterprise Resource Planning) services tailored to the specific needs of the education and industrial sectors. Our primary clientele consists of 29 government universities, where we secure business through a formal tender process. Additionally, we cater to 09 private universities by employing proactive sales and marketing strategies to secure orders. Our aim is to provide the best digital solutions to Educational Institutes, enterprises and travel industries.

We also provide complete solution including of server, hardware and network services. We operate on a subscription-based revenue model that includes two main components. First, we charge a one-time fee for software license cost and implementation at the client's premises, data migration to the cloud, and training on how to use the software. Following the initial implementation, for the subsequent years, we bill clients an annual subscription fee. Additionally, we charge for any changes

or upgrades they request after the initial installation.

As we operate on a subscription model, any disruption in the business relationship or any customer dissatisfaction can lead to termination or non-renewal of our contract which will lead to lost in our recurring revenue. Our existing clients have no obligation to renew their contracts, and renewal rates may decline or fluctuate due to a number of factors, including customers' satisfaction with our services, our prices and the prices of competing service providers. Additionally, to increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales, and our operating results would be adversely affected.

If we fail to sell our services to new customers or if our existing customers do not renew their contracts, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

12. Delays in receiving payments from our clients could have a significant adverse effect on our cash flow, business operations, and financial position.

The details of our trade receivables outstanding for the year ending on March 31, 2025, 2024 and 2023 are as follows:

Pursuant to the certificate dated June 09, 2025, issued by Peer Review Auditor of our Company, M/s Keyur Shah & Associates, Chartered Accountants.

Although the majority of our receivables are within a manageable period, there is still a risk that delays could occur, particularly in cases where customers face financial difficulties or other issues that hinder payment.

We cannot guarantee the full recovery of current or future trade receivables. Additionally, pursuing overdue receivables could incur significant costs, which may not always be recoverable.

Given our substantial working capital requirements, any delay in the collection of receivables, or failure to recover amounts owed, could negatively impact our cash flow, financial health, and overall performance.

Steps to Mitigate Trade Receivables Risks
To minimize the risks associated with delayed collections and ensure the timely recovery of dues, our Company has implemented the following procedures:

Stringent Credit Assessment: We conduct thorough financial assessments of potential clients before extending credit, ensuring that we only engage with customers who have the financial capacity to meet their payment obligations.

Customer Relationship Management: Our dedicated relationship managers maintain strong communication with customers, addressing concerns and facilitating prompt payments. This proactive approach helps in maintaining positive customer relationships while ensuring timely payment.

Optimized Credit Terms: We regularly review and adjust our credit terms based on market conditions and financial prudence, balancing competitiveness with the need to protect our cash flow.

Automated Invoicing and Payment Tracking: We have implemented automated invoicing and payment tracking systems to ensure accurate, timely invoicing and better monitoring of payment due dates, helping to streamline collections.

Structured Escalation and Recovery Process: In the event of delayed payments, we follow a structured escalation process that includes regular follow-ups, reminders, and, where necessary, negotiations with customers to expedite overdue payments.

While these measures are designed to reduce the risk of delayed or defaulted receivables, there can be no assurance that they will fully eliminate delays or defaults. Therefore, our business may still face challenges if customers fail to meet their payment obligations on time.

13. ***We may not be able to recognize revenues in the period in which our services are performed, which may cause our margins to fluctuate.***

Our revenue model is subscription-based and consists of two main elements. Initially, we charge a one-time fee for the software license, which includes implementation at the client's site, cloud data migration, and training on how to use the software. After this initial phase, clients pay an annual subscription fee for ongoing access and support. Any additional changes or upgrades requested after the initial installation will be billed separately. Our services are performed under both time and material and fixed-price contract arrangements, or a combination of both. Revenue is recognized upon transfer of control of products or services to customers to the extent of an amount that reflects the consideration that we expect to receive in exchange for these products or services. In instances where final acceptance of the system or solution is specified by the customer, revenues are deferred until all acceptance criteria have been met. Our failure to meet all the acceptance criteria, or otherwise meet a customer's expectations, may result in our having to record the cost related to the performance of services in the period that services were rendered, but delay the timing of revenue recognition to a future period in which all acceptance criteria have been met.

14. ***We are required to furnish bank guarantees as part of our business. Our inability to arrange for such guarantees or the invocation of such guarantees may adversely affect our cash flows and financial condition.***

Bidding in the IT domain tenders in the field of education is major area for expanding our business prospects. For further details in this regard, please refer to the heading titled *"**Our Business – Our Business Strategies**"* beginning on page 151.

As per terms of the tenders we participate, we are required to furnish financial and performance bank guarantees in favour of our clients. These guarantees are typically required to be furnished within a few days of the signing of a contract and remain valid for period of certain days after the defect liability period prescribed in the contract.

If we are unable to provide sufficient collateral to secure financial bank guarantees, or performance bank guarantees, our ability to enter into new contracts could be limited and could adversely affect our business, results of operations and financial condition.

15. ***Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.***

We provide tailormade ERP software solutions to educational institutions and business across India. Our business is dependent upon increasingly complex and interdependent IT system. For details of

our IT Systems, please refer to the heading titled *"**Our Business – IT Infrastructure and Data Privacy**"* on page 160.

The size, complexity and external location of our computer systems make them potentially vulnerable to breakdowns. Many of our services involves handling of confidential information and any breach of this information due to any cyber-security attacks including viruses, ransom ware and spam attacks. Our insurance coverage may not be adequate to cover all the costs related to cyber-security attacks or disruptions resulting from such events. Further, our financial, accounting, or other data processing systems may fail to operate adequately, or at all, because of events that are beyond our control, including a disruption of electrical or communications services in the markets in which we operate. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis.

Our systems are potentially vulnerable to data security breaches, whether by our employees, our clients, our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches and we have not experience any disruptions of this nature in past, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

16. ***Property, on which we have our registered and corporate office is not owned by us and is taken on lease from our promoter. Any termination or dispute in relation to this lease/ rental/tenancy agreement may have an adverse effect on our business operations and results thereof.***

The properties where our registered office is situated in Rajkot, Gujarat is not owned by our company and the same have been taken on lease from the one of the promoters of our Company, Mr. Bhaveshkumar Dhirajlal Gadhethriya, with whom we have entered into a registered rent agreement dated August 26, 2025 for a term of 5 years. For details on properties taken on lease / rent by us please refer to the heading titled *"**Our Business - Properties**"* on page 162.

The agreements are renewable on mutually agreed terms. The rent agreements have a clause for the renewal of the same for a further period as may be mutually agreed among the parties after the expiry of the current period. In the event of the said agreements are not being renewed or agreement is terminated by either of the parties or upon expiry of the said agreement or increase in rent or any non-compliance, we may have to either vacate the registered office and re-locate to another premises or agree to pay the extra amount for using the same prices. Further, increase in rent structure will lead to increase of our expenditure which in turn will lead to decrease of revenue and increase of operational cost.

17. ***Our insurance may be insufficient to cover all losses associated with our business operations.***

We have covered our business premises with the insurance cover and have taken insurance policy for benefits of our employees. For details of insurance policies cover taken by us please refer to the heading titled *"**Our Business – Insurance**"* on page 162-163.

We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage, including those caused by natural disasters and other events beyond our control,

we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future.

18. We have contingent liabilities that have not been provided for in our Company's financials which if materialised, could adversely affect our financial condition.

As of March 31, 2025, we had **₹ 33.29 Lakhs** of contingent liabilities that had not been provided for. A summary table of our contingent liabilities as of March 31, 2025, as disclosed in the Restated Financial Information is set forth below:

(Amount in Lakhs)

Particulars	As on March 31, 2025
Contingent Liabilities	
Bill Discounting	-
Direct Tax Matters	0.54
Indirect Tax Matters	-
Performance Guarantee given by company	32.75
Total	**33.29**

For details, see ***"Financial Statements as Restated***" and "***Management's Discussion and Analysis of Financial Condition and Results of Operations - Contingent Liabilities***" on pages 202 and 279 respectively, for more information. Any or all of these contingent liabilities may become actual liabilities. In the event that any of our contingent liabilities become non-contingent, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Fiscal Year or in the future.

19. Elevated Employee Attrition Rates and Their Potential Impact on Operational Continuity and Project Execution.

Our Company has experienced a significant increase in employee attrition rates over the past three fiscal years. The table below provides a summary of our attrition rate of our company for the past three fiscal years.

FY	Average Employee of our company during the year	Employee left with the company	Attrition rate
2024-25	110	28	25.45%
2023-24	89	16	17.98%
2022-23	81	48	59.26%

Note: Pursuant to the certificate dated June 04, 2025, issued by statutory and peer review auditor of our company, M/s Keyur Shah & Associates, Chartered Accountants.

High attrition rates can lead to several adverse effects, including increased recruitment and training costs, loss of institutional knowledge, and potential disruptions in project continuity and client relationships.

Our Company acknowledges that its success is heavily dependent on the expertise and continuity of its workforce. Challenges in attracting and retaining qualified professionals may adversely affect business operations, financial performance, and the ability to meet strategic objectives.

While our Company is implementing measures to enhance employee engagement and retention, there can be no assurance that these efforts will result in a sustainable reduction in attrition rates. Continued high turnover may materially and adversely affect our business, results of operations, and financial condition.

20. ***Certain secretarial records and documents filed by us with the Registrar of Companies related to the appointment and reappointment of our erstwhile auditor are not traceable.***

Our Company has not been able to trace certain secretarial records and regulatory filings, forms pertaining to appointment and reappointment of our erstwhile auditor M/s S. C. Makhecha & Associates, Chartered Accountants. Despite undertaking an extensive search of our available records, these documents could not be located. Consequently, we have relied on a certificate issued by M/s. H Togadiya & Associates, Practicing Company Secretary and alternative documentations such as minutes of meetings of the Board maintained by our Company, and subsequent annual filings and financial statements that capture the relevant details. However, no additional compliance-related filings in respect of these could be traced, either in our internal records or those of the Registrar of Companies.

Accordingly, we cannot confirm whether such filings were made in accordance with applicable law, were made at all, or were filed within the prescribed timelines. While no penalties or regulatory actions have been imposed on our Company in connection with these missing records as of the date of this Red Herring Prospectus, we cannot assure you that such actions or proceedings will not be initiated in the future, or that we will not be subject to penalties or other consequences in this regard.

21. ***Our success depends substantially on the continuing services of our promoters, senior executives and other key highly skilled IT personnel.***

Our future success heavily depends upon the continued services of our promoters, senior IT executives and other key employees. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit, train and retain experienced, talented and skilled professionals. A significant increase in the attrition rate among skilled IT professionals with specialized skills could decrease our operating efficiency and productivity and could lead to a decline in demand for our services. If one or more of our senior IT executives or key employees are unable or unwilling to continue in their present positions, it could disrupt our business operations which could materially adversely affect our business, financial condition and results of operations, and we may not be able to replace them easily or at all. If any of our senior IT executives or key personnel joins a competitor or forms a competing company, we may lose customers, suppliers, know-how and key IT professionals and staff members to them which may materially and adversely affect our business, financial condition and results of operations. Also, if any of our business development managers, who generally keep a close relationship with our customers, joins a competitor or forms a competing company, we may lose customers, and our revenues may be affected. Additionally, there could be unauthorized disclosure or use of our technical knowledge, practices or procedures by such personnel. If any dispute arises with our senior IT executives or key personnel, any non-competition, non-solicitation and non-disclosure provisions in our employment agreements we have with our senior IT executives or key personnel might not provide effective protection to us. If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans it may affect our business, financial condition and results of operations. Furthermore, the competition for highly skilled IT professionals may require us to increase salaries, and we may be unable to pass on these increased costs to our customers. This would increase our operational costs which may adversely affect our business, results of operations and financial condition.

In addition, our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain these professionals, including experienced management IT professionals, which enables us to keep pace with growing demands for outsourcing, evolving industry standards and changing customer preferences. If we are unable to attract and retain the professionals we need, we may have to forgo projects for lack of resources and innovation or be unable to staff projects optimally. Moreover, we may not be able to manage knowledge that is developed internally, which may get lost in the event of our inability to retain

employees.

Our business is people-driven and there is significant competition for IT professionals in India and that such competition is likely to continue for the foreseeable future. Increased hiring by technology companies and increasing worldwide competition for skilled IT professionals may lead to a shortage in the availability of suitable personnel in the locations where we operate. Failure to hire, train and retain IT professionals in sufficient numbers could have a material adverse effect on our business, results of operations and financial condition.

22. ***A major part of our total revenue from operations is generated from the State of Gujarat which accounts for 93.16%, 93.03% and 76.76% respectively, of our total revenue from operations for the Fiscal Year ended on March 31, 2025, 2024 and 2023. Any adverse developments affecting our operations in such region, could have an adverse impact on our business, financial condition, results of operations and cash flows.***

We generate majority of our revenue from the state of Gujarat. The following table sets forth our revenue from operations from Gujarat in the periods indicated:

(Amount in Lakhs)

Geography	For the Fiscal Year ended on March 31					
	2025		2024		2023	
	Amount	%	Amount	%	Amount	%
Gujarat	1,229.14	93.16%	946.22	93.03%	397.00	76.76%

Due to the geographic concentration of the revenue from operations generated from Gujarat, our operations are susceptible to local and regional factors, such as economic and weather conditions, natural disasters, demographic changes, and other unforeseen events and circumstances. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in this region, or changes in policies of the state or local governments or the government of India or adverse developments related to competition in this region, may adversely affect our business, results of operations, financial condition and cash flows. While we have not experienced any of the above adverse situations that had an adverse impact on our business operations and financial conditions in the past, but we cannot assure you that these adverse situations will not arise in the future.

23. ***Our 32.82%, 61.34% and 65.45% of total revenue for the financial ending on 31st March 2025, 2024 and 2023 is derived via participation in tender floated by Government and other related. In case we fail to bid in tender floated or not able to win the tender, our financial performance will be seriously affected.***

Our 32.82%, 61.34% and 65.45% of total revenue for the financial ending on 31st March 2025, 2024 and 2023 is reliant on projects undertaken of government authorities and other government-funded entities. Contracts awarded by central, state, or local government authorities are based on a tendering process. We compete with various infrastructure companies when submitting tenders to the government and other agencies. If we do not qualify or fail to be the lowest bidder, we risk losing the business. We cannot guarantee that any of the bids we submit will be accepted or awarded, making it essential for us to secure business by bidding at competitive rates. To maximize our chances of success, our company strives to prepare the most competitive tenders and offer the most attractive pricing.

The number of bids we have participated in, along with those that have been awarded or not assigned, as of the filing of the RHP for the past three fiscal years, are outlined below:

Particulars	March 31, 2025	March 31, 2024	March 31, 2023
No. of Bids Participated	31	23	21
No. of Bids Accepted	6	5	4
No. of Bids Lost	7	8	10
No. of Bids Cancelled by the Department	2	5	7

Under Evaluation	16	5	0

While we aim to succeed with every bid, there is no assurance that we will win all the projects we bid for. In case our success rate falls, it will affect our revenue and our profitability will be affected.

24. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see ***"Government and Statutory Approvals"*** beginning on page 296.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

25. *Increase in manpower cost for IT professionals could reduce our cash flows and profit margins.*

We operate in the IT industry and provide tailormade ERP solutions to various educational institutes and business across India with an aim to help them in storing, accessing and analyzing the data in a much easier and efficient way possible. The ERP software is tailormade specifically to our customer needs which vary from one customer to another. To understand the need of our customers and develop the software accordingly, we need to invest heavily on our human resource activities to attract best talents to complete the projects.

The details of the employee related expenses as a %age of revenue from operations is as under:

(in Lakhs)

Particular	FY 24-25	% of revenue from operations	FY 23-24	% of revenue from operations	FY 22-23	% of revenue from operations
Employee Related Expenses	342.91	25.99%	306.13	30.10%	213.05	41.20%

Historically, manpower costs in the Indian IT services industry have been significantly lower than manpower costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, manpower cost increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, salary increase may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services.

26. *Our marketing and advertising campaigns may not be successful in increasing the popularity of our products and offerings.*

If our marketing initiatives are not effective, this may adversely affect our business and the results of operations. Our revenues are influenced by our marketing plans, including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. In addition, the support of our employees is also critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programmes and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate, could adversely affect our results of operations and financial condition. Moreover, a material decreases in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business and results of operations.

Such related party transactions may potentially involve conflicts of interest.

us when compared to similar transactions with unrelated or third parties or that our related party transactions, individually or in the aggregate, will not have an adverse effect on our financial condition. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. The risks associated with the deployment of manpower include possible claims relating to:

- actions or inactions, including matters for which we may have to indemnify our customers;
- Our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- failure of manpower engaged by us to adequately perform their duties or absenteeism;
- errors or malicious acts or violation of security, privacy, health and safety regulations;

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and affect our business. While our company in past has not encountered any such incidence however any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and consequently, our business, financial condition, results of operations and prospects.

Specific parameters for GSM include net worth, net fixed assets, price to earning ratio, market capitalization and price to book value, among others.

Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our

Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

45. ***There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which* may *adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

46. ***The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may* experience *price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

47. ***After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

- Significant developments in India's economic and fiscal policies; and

There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that

the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

48. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by Book Built Method. This price is be based on numerous factors, for further information, please refer chapter titled *"**Basis for Issue Price**"* beginning on page 112 and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

49. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

Pursuant to SEBI ICDR Regulations, QIBs and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting the Bid. Individual Investors can revise their Bid during the Bid Period and withdraw their Bids until Bid Closing date. While our Company is required to complete Allotment pursuant to issue within six working days from the Bid Closing date, events affecting the Bidders decision to invest in Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, result of operations or financial condition may arise between the date of submission of the Bid and allotment. Our Company may complete the allotment of Equity shares even if such events occur, and such events limit the Bidders ability to sell the Equity Shares allotted pursuant to the issue or cause the trading price of Equity Shares to decline on listing.

51. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market

price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS FACTORS

Industry Related Risks

52. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect our Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and our Company's business in particular.

53. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Other Risks

54. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.

As stated in the reports of the Auditor included in this Red Herring Prospectus under chapter ***"Financial Statements as Restated"*** beginning on page 202, the financial statements included in this Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Red Herring Prospectus.

Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

55. Changing *laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

For instance, in November 2016, the Government of India demonetized certain – high value denominations of currency. Trading and retail businesses in India were impacted for a limited period of time on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process.

The Government of India implemented a comprehensive national goods and service tax ("GST") regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

Further, the General Anti Avoidance Rules came into effect on April 1, 2017. The effect of the application of these provisions to our business in India is at present uncertain. Furthermore, the Finance Act, 2019 instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long-term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others.

56. *Political instability or a change in economic liberalization and deregulation policies could* seriously *harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

57. *We* cannot *guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Red Herring Prospectus.*

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that we consider are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled **"*Our Industry*"** beginning on page 124. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

58. Financial* instability *in Indian financial markets could adversely affect our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

59. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME BSE Limited could adversely affect the trading price of the Equity Shares.

60. Global* economic*, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

61. ***Foreign* investors *are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. ***The extent and* reliability *of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

63. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

DETAILS OF THE OBJECTS OF THE ISSUE

The details in relation to the objects of the Issue are set forth herein below.

1. ***Development of Proprietary Technology Solution called "ZEROTOUCH DaaS" (Device as a Service) ("Proposed Project");***

Our Company proposes to utilise an estimated amount of up to **₹ 375.00 lakhs** from the Net Proceeds towards development of its proprietary technology solution called ***"ZEROTOUCH DaaS"*** (Device as a Service) to address the challenges of securing the examination papers from leakage during their preparation, printing and distribution. Currently, in the existing examination system, many people are involved at each step, which increases the risk of the exam papers being leaked or accessed by unauthorized individuals. ***"ZEROTOUCH DaaS"*** aims to reduce these risks by cutting down the involvement of people and using technology to handle the process.

This system will minimize human contact with the exam papers. It uses advanced, smart solutions to ensure the handling of confidential documents in more secure and efficient manner, leading to a smoother overall process.

"ZEROTOUCH DaaS" consists of both hardware and software working together. The working of the same shall be done in the following manner:

Software process and working:
The software component of ***"ZEROTOUCH DaaS"*** technology is a proprietary application developed in house by our company IT team. This software facilitates the digitized preparation of question papers by aggregating question patterns and individual questions submitted by various teachers. These questions are then uploaded in the ***"ZEROTOUCH DaaS"*** software and the algorithm and artificial intelligence (AI) built in ***"ZEROTOUCH DaaS"*** software aligns the question selection process with the prescribed syllabus and marking scheme of the respective examination and prepare the question paper.

To maintain confidentiality, the ***"ZEROTOUCH DaaS"*** software uses algorithmic selection and artificial intelligence (AI) to randomly compile final question papers from the uploaded pool created by obtaining questions from various teachers, ensuring no individual has full visibility of the final paper. Once generated, these papers are securely stored on cloud server of our Company. These question papers are protected through 256-bit encryption and firewalls. The infrastructure undergoes regular Vulnerability Assessment and Penetration Testing (VAPT) audits to ensure the confidentiality of all stored data and will ensure that there are no data leaks in the software. Additionally, the software stores important details such as the schedule of the exam, exam date, time, and locations within the system. This software enables confidentiality and avoids any breach of data.

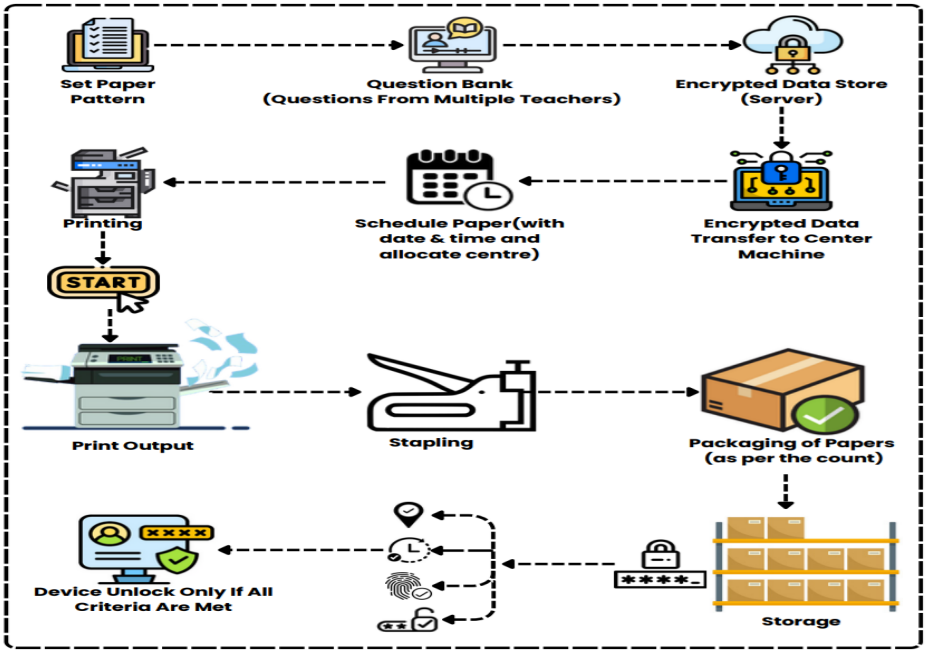
Hardware of the "ZEROTOUCH DaaS" Software
The hardware component consists of a custom-designed printing machine, purposely built to function in synchronization with the software. Upon secure uploading of the final question papers to the cloud

servers, the data is accessed by the machine, which is connected to the cloud servers through secured Wi-Fi. These machines are deployed at designated examination centres and are operated solely by authorized personnel nominated by the respective university or client.

Access to the machines is protected through a multi-layered authentication mechanism, comprising biometric fingerprint scanning, password authentication, and geo-tagging controls. Each device is programmed to initiate printing strictly as per the examination schedule, thereby eliminating any premature access to the content and breach of any data. Once triggered, the machine autonomously performs printing, stapling, and bundling of examination papers into pre-defined sets, in accordance with the number of students and classrooms, as per the input data provided.

Post-printing, the bundles are securely stored in a lockable compartment within the device, sorted for distribution. The machines maintain continuous connectivity through Wi-Fi to facilitate timely execution as per the schedule.

Process of using *"ZEROTOUCH DaaS"*:
The process of using this product is as follows:



Patent
Our company has filed a patent application for its proprietary technology, ***"ZEROTOUCH DaaS"*** with the Indian Patent Office. Breakdown of Project Costs

Design and Prototype Development
Our company during the first stage of developing our ***"ZEROTOUCH DaaS"*** (Device as a Service) technology, focused on pre-development design and prototype development. This stage was important for building a clear understanding of what the system needed to do and how it would work. The goal was to create a secure and automated process for preparing, printing, and distributing examination papers with limited human involvement.

The stage involved evaluating the existing examination system to identify the risks and points where confidential data could be exposed. Based on the evaluation, functional and technical requirements for the software and hardware were defined which comprises of features such as AI-based question selection, cloud-based storage with encryption, and a secure printing process.

Once the structure was finalized, designing the software and hardware systems was initiated. The software was designed to collect questions from multiple teachers and use algorithms and artificial intelligence to generate the final question paper, without giving full visibility to any single person. For the hardware, a secure printing device that could receive encrypted papers from the cloud and print them at the examination centre at the dedicated time schedule was developed.

As part of this stage, a prototype of the concept was developed. This included a basic version of the software and a sample model of the hardware. Prototype was used to ensure whether the system could work as intended and to make necessary adjustments.

Finally, a feasibility study was conducted to examine if the project was technically and financially possible within our planned timeline and resources.

The total cost incurred during the Design and Prototype Development process is as under:

(In Lakhs)

S. No.	Product Description	Supplier Name	Amount Funded from Internal Accruals	Amount to be funded from Net Proceeds

3.	Electric Stapler	Peach Imports LLP	0.06	-
4.	Printer	Shiv Computer World	0.19	-
Total			**13.55**	**-**

Software development

Once the prototype was developed and found technically and financially viable, the development of the ***"ZEROTOUCH DaaS"*** software was executed entirely in-house by our dedicated team of 58 employees. This phase involved writing and implementing core functionalities, including question collection, AI-based paper generation, secure data storage, and scheduling tools. The team also developed the user interface and created the necessary APIs to ensure smooth system integration. Additionally, the software was rigorously tested through system testing to ensure reliability, security, and performance. Once fully developed, a user manual of the ***"ZEROTOUCH DaaS"*** was prepared for the internal use and for clients use. This helps in training users and supporting smooth implementation at client locations

Additionally, a cost was incurred for filing the patent application for the ZEROTOUCH technology with the Indian Patent Office.

The total cost incurred during the Software Development process is as under:

3. Funding of Tender Deposits and Earnest Money Deposits (EMD) towards Tenders

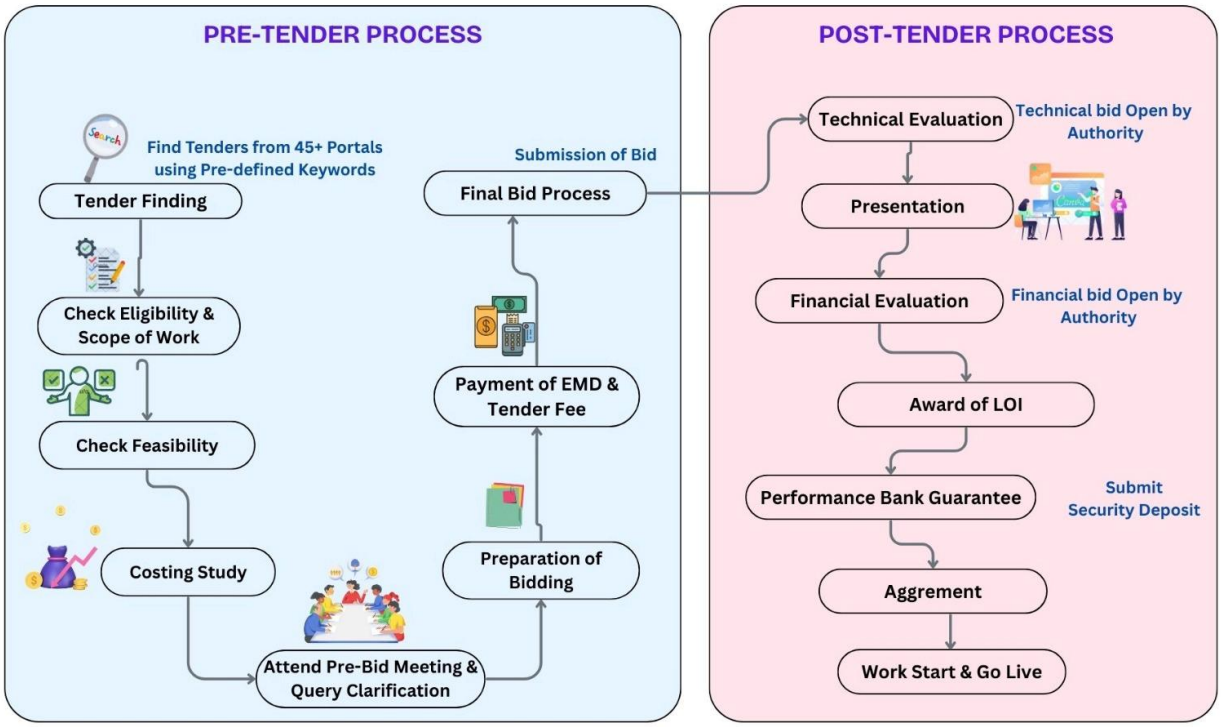
Our company proposes to utilise an estimated amount of up to ***₹ 400 Lakhs*** towards the financing of Tender deposits and EMDs required in bidding any tenders. Our company business majorly comes from education field and that too from universities owned by Central/State Governments or aided by Central/State Governments and private educational institutions. Our company also generated revenue apart from sale of industrial ERP solutions. All universities floats tender for their IT requirements and therefore participation in tender for future growth in inevitable for our company.

Our company in the last three fiscal years reported in the offer document had participated in tender in the following manner:

S. No.	Fiscal Years	No of tenders in which participation was done	No of tenders awarded to our company	Tenders in Progress against which EMD is submitted
1	2024-2025	31	6	16
2	2023-2024	23	5	5
3	2022-2023	21	4	0

Participation/bidding in tenders involves multiple stages, including pre-tender activities such as identifying suitable tenders, evaluating eligibility criteria, assessing feasibility, preparing cost

estimates, attending pre-bid meetings, and finally submitting the bid with the required documents. The tendering process is outlined below:



The tendering process also involves submission of technical and financial bids. The financial component involves deposit of Earnest Money Deposit **(EMD)**, which is a refundable deposit submitted along with the bid as a token of commitment. The EMD serves as a safeguard for the tendering authority, ensuring that bidders do not withdraw or default after submitting the bid.

In case tender is awarded to our company, we are also required to submit a tender deposit or Performance Bank Guarantee (PBG). This amount is usually a fixed percentage of the total contract value and is held by the authority as security to ensure the successful execution of the project. The PBG is typically valid throughout the duration of the project and may extend into the maintenance period, depending on contract terms.

There have been few instances in past where we have identified tenders that align with our service offerings and operational capabilities but due to the unavailability of sufficient liquid funds to provide EMDs or tender deposits, we have not been able to submit bids for all feasible opportunities. This has resulted in missed prospects that could have contributed meaningfully to our growth. To overcome this limitation, we propose to allocate ***₹ 400 lakhs*** from the Net Proceeds of the Issue towards creating a dedicated fund for meeting EMD, tender deposit, and related financial requirements.

Participating in government tenders offers several long-term benefits. These contracts are typically of longer duration and often include Annual Maintenance Contracts (AMCs), which provide recurring revenue and operational stability. Additionally, successful execution of such projects enhances our credibility and opens doors to further opportunities with government agencies and public sector clients. By ensuring the availability of funds for tender-related obligations, we aim to increase our participation in government contracts, thereby strengthening our order book and long-term business outlook.

4. Funding the Incremental Working Capital Requirement of our Company

Reasons for Existing Working Capital Gap:

There has been a constant increase in the working capital requirements of our company during the last 3 fiscal years, due to an increase in revenue of our Company from ₹ 517.17 Lakhs in FY 23 to ₹ 1,319.23 Lakhs in FY 25. For the reasons behind the increase in the revenue of our company during the last 3 fiscal years, please refer to section ***"Management Discussion and Analysis of Financial Condition and Results Of Operations - Comparison of Restated Financials for the year ended March 31, 2025, With Fiscal Year Ended March 31, 2024"*** and ***"Management Discussion and Analysis of Financial Condition***

and Results Of Operations - Comparison of Restated Financials for the year ended March 31, 2024, With Fiscal Year Ended March 31, 2023" on pages 273 and 275 respectively.

THE REASON BEHIND THE INCREASE IN WORKING CAPITAL GAP OF OUR COMPANY IN FY 24 IN COMPARISON TO FY 23:

The working capital gap of our company increased from ₹ 74.86 Lakhs in FY 23 to ₹ 372.90 Lakhs in FY 24. The reason behind such increase in the working capital gap is due to the following reasons:

Increase in Trade Receivables

The Trade Receivables of our company increased from ₹ 131 Lakhs in FY23 to ₹ 401.96 Lakhs in FY24 leading to increase by ₹ 270.96 Lakhs. This was major reason for the increase in working capital gap. During the FY24, the revenue from operations doubled from ₹ 517.17 Lakhs in FY23 to ₹ 1,017.16 Lakhs in FY24. The details of rise are as under:

(₹ in Lakhs)

Particulars	For the year ended March 31, 2024		For the year ended March 31, 2023	
	Amount	%	Amount	%
Revenue from operations				
Software services				
- Educational Industry	508.09	49.11%	221.23	41.10%
- ERP Industrial Software	289.10	27.94%	69.77	12.96%
Online Examination	218.77	21.15%	225.99	41.98%
Digital learning	1.20	0.12%	0.18	0.03%
Total Revenue from Operations	1,017.16	98.33%	517.17	96.07%
Other Income	17.39	1.67%	21.12	3.93%
TOTAL INCOME	**1,034.55**	**100%**	**538.29**	**100%**

During the FY24, revenue from software services increased from ₹ 291 Lakhs to ₹ 797.19 Lakhs, which lead to rise in sundry debtors. The education ERP contributed ₹ 286.86 Lakhs increase in revenue and Industrial ERP contributed ₹ 219.33 Lakhs increase in revenue. As the education ERP was installed in Government owned or aided universities, which generally have 4-5 months outstanding, sundry debtors has increased. In addition to education ERP, the sale of industrial ERP has increased many fold times, which lead to increase in sundry debtors and in turn working capital gap.

Further with increase in sale of Government ERP sales, the investment of our company was also made in Fixed deposits for issuing Bank guarantees towards performance guarantee. This also lead to increase in working capital gap.

THE REASON BEHIND INCREASE IN THE WORKING CAPITAL REQUIREMENT OF OUR COMPANY IN FY 25 IN COMPARISON TO FY 24:

The working capital requirement of our company increased from ₹ 372.90 Lakhs in FY 24 to ₹ 926.37 Lakhs in FY 25. The increase in the working capital requirements was majorly attributable because of the following reasons:

Focus upon the increasing the tender contract business:

To drive further business growth of our company, we strategically focused more upon applying and securing new high value tender contracts. These long-term, high-value tender projects offer multiple revenue streams for our company like Development and deployment of ERP software fees and annual maintenance charges during the term of the contract. This approach enables us to establish a steady and recurring revenue base and expand our operational footprint. Our company has a total order book in hand of **₹ 5,555.17 Lakhs** out of which only ₹ 1,330.14 lakhs were realised till FY25.

The tendering process requires submission of an Earnest Money Deposit (EMD) with the bid and, if tender is awarded, a Performance Bank Guarantee (PBG). These deposits serve as financial security for the tendering authority, ensuring the bidder's commitment and proper execution of the contract

throughout its duration and maintenance period. The average EMD submitted amounts to 5% of the total tender value.

In previous fiscal years, due to working capital constraints and low level of liquid cash, our company was only applying for lower value tender contracts and refrained from applying to high value tenders as the EMD amount submitted along with the tender application will increase as well.

Thus, to mitigate this issue, our company raised ₹ 184.00 Lakhs via private placements of 1,42,000/- equity shares of face value of ₹ 10/- each at issue price of ₹ 130 per share on December 12, 2024. For further details, please see section ***"Capital Structure - Notes to the Capital Structure"*** on page 78. With the influx of the additional capital, we were able to maintain a higher level of liquidity in form of short-term deposits to bid for higher value tender contracts and use the same for submitting EMD along with the tender application.

Therefore, in order to maintain adequate level of liquidity in which enables our company to bid for these higher value contracts, our company increased the level of short-term deposits from ₹ 37.73 Lakhs in FY 24 to ₹ 289.75 Lakhs in FY 25.

Increase in the trade receivables:
In FY 25, the revenue increased from ₹ 1,017.16 Lakhs to ₹ 1,319.23 Lakhs. With the increase in the revenue, there was an increase in the trade receivables of our company which increased from ₹ 401.96 Lakhs in FY 24 to ₹ 568.65 Lakhs in FY 25. The trade receivable holding period also increased from 98 days to 134 days.

The increase in the trade receivable level of our company was due to the new ERP software sales worth ₹ 130.50 Lakhs in the month of March 2025, for which the payment is scheduled to be received in the month of June/July. Due to new sales made in march, the trade receivables level increased from ₹ 401.96 Lakhs in FY 24 to ₹ 568.65 Lakhs in FY 25. This ultimately resulted in increase in the working capital gap.

Reduction in Trade Payables:
During the year, with the increased liquidity due to raising of funds via private placements our company made early payments to our vendors/suppliers which resulted in reduction of the trade payables. Trade payables of our company reduced from ₹ 44.67 Lakhs in FY 24 to ₹ 2.40 Lakhs in FY25. Early payments made to vendor during the year helped our company to negotiate a better deal from our service providers and consequently reduction is the cost and ultimately increasing our profit margins.

Therefore, with an increase in the trade receivables, increase in the short-term fixed deposits and reduction in trade payable levels in FY 25 resulted in an increase in the working capital requirement.

Reduction in Other Current Liabilities:
The other current liabilities reduced from ₹ 172.66 Lakhs in FY 24 to ₹ 117.78 Lakhs in FY 25. This was due to reduction in the Current Tax liabilities which reduced from ₹ 73.47 Lakhs to ₹ 2.30 Lakhs. Our company made additional advance tax payments in FY 25 which resulted in a decrease in the current tax liability. This reduction has led to increase in working capital gap.

BASIS OF ESTIMATION OF WORKING CAPITAL REQUIREMENT
On the basis of existing working capital requirement of our Company and assumptions for such working capital requirements, our Board pursuant to its resolution dated **September 06, 2025**, has approved the projected working capital requirements for March 31, 2026 and as on December 31, 2026 and the proposed funding of such working capital requirements as set forth below:

Justification of enhanced working capital requirements

The working capital gap of our company increased to **₹ *1,757.31 Lakhs*** and **₹ *2,702.19 Lakhs*** in FY26 and FY27 respectively. The reason behind such increase in the working capital gap is due to the following reasons:

1. Increase in the trade receivables:

The trade receivables level of our company is proposed to increase to ₹ 900 Lakhs and ₹ 1,100 Lakhs in FY 26 and FY 27 respectively.

As per our company business strategy, our company aims to focus more upon the B2G business segment by bidding and participating in educational ERP tenders floated by Central/State Governments universities or universities aided by Central/State Governments. As per our company experience in the type of business, the average credit period stretches from 120 to 150 days. Since revenue of our company will be increasing with through focusing more towards the acquisition and completion of government contracts, the trade receivable period will increase.

2. Increase in the levels of short-term deposits:

Our company will aim to increase its business by bidding in high value educational ERP tenders and Industrial ERP tenders. In order to bid in educational and industrial ERP tenders of high value, we need to have funds to furnish the earnest money deposit for bidding in the tenders and if awarded then to furnish the performance bank guarantee.

Our company in the last three fiscal years reported in the offer document had participated in this type of tender in the following manner:

S. No.	Fiscal Years	No of tenders in which participation was done	No of tenders awarded to our company	Tenders in Progress against which EMD is submitted
1	2024-2025	31	6	16
2	2023-2024	23	5	5
3	2022-2023	21	4	0

With the infusion of additional working capital through the net proceeds of the issue, our company aims to increase its level of short-term deposits which can be utilise to fund the EMD that is to be submitted along with the tender bid application. This increased liquidity in funds will help our company

to apply to multiple tender application and tap into the additional business opportunity and onboard undertake new government contracts which will ultimately increase the business of our company.

Therefore, the short-term deposits of our company is projected to increase to ₹ 400 Lakhs and ₹ 850 Lakhs in FY 26 and FY27 respectively**.**

3. Increase in the Other Financial and current assets:

The Other Financial and current assets of the company increased from Rs. 64.16 Lakhs in FY25 to Rs. 450.00 Lakhs and Rs. 592.50 Lakhs in FY26 and FY27 respectively. This is due to increase in the GST receivable levels, increase in the prepaid expenses of the company.

*#Justification of the increasing working capital cycle is mentioned above under the section **"Objects of the Issue - The reason behind the increase in Working Capital Gap of our Company in FY 24 in comparison to FY 23"**, **"Objects of the Issue - The reason behind the increase in Working Capital Gap of our Company in FY 25 in comparison to FY 24"** and **"Objects of the Issue - Justification of enhanced working capital requirements"** on pages 104, 105 and 107 respectively*

Justifications for Holding Period levels:

Justifications for the holding levels mentioned in the table above are provided below:

Particulars	Justification for Holding Levels
Trade Receivables	Our company generally provides services on credit to our customers for a credit period of 105 days, 96 days, and 134 days in the FY23, FY24, and FY25 respectively. In FY 25, our company's revenue rose from ₹ 1,017.16 Lakhs to ₹ 1,319.23 Lakhs, resulting in an increase in trade receivables from ₹ 401.96 Lakhs to ₹568.65 Lakhs. This was largely driven by ₹ 130.50 Lakhs in ERP software sales in March 2025, with payments scheduled for June/July. Consequently, the trade receivable holding period increased from 98 to 134 days, contributing to a rise in the working capital gap. Our company has estimated holding levels of 134 days and 135 days for FY26 and FY27 respectively based on the holding levels for the FY 25. Our company started focusing more upon its B2G business and undertook government contracts in FY 24 and FY 25. Our company will continue to keep focusing on its B2G business in FY 26 and FY 27. The average credit period provided during these government contracts is 120 - 150 days. Therefore, we estimate to provide similar credit period to our customers and the trade receivable holding days will remain on a similar lever i.e. 134 days and 135 days in FY 26 and FY 27 respectively.
Trade Payables	Our company's trade payables predominantly comprise of payables towards the purchase of server costs, online examination charges and web development expenses. The trade payable holding days were approximately 177 days, 93 days, and 58 days of purchases for FY 23, FY24, and FY25 respectively. In FY 25, our company raised funds through private placements, which enabled early payments to vendors, reducing trade payables from ₹ 44.67 Lakhs in FY 24 to ₹ 2.40 Lakhs in FY 25. This allowed for better negotiation with service providers, leading to cost reductions and improved profit margins leading to a decline in the Trade Payable holding days of our company from 93 days to 58 days. Our Company historically reducing the holding period of creditors from 177 days in FY 23 to 58 in FY 25 to avail discounts and better margins results in improved profitability of our Company. Following this trend and to increase our profitability and margins in future, our Company has proposed to utilize a part of the fresh issue proceeds towards working capital requirements which will lead to early payment to creditors and a reduction in the outstanding days payable. Hence trade payables days are estimated at 5 days of purchases each for FY26, and FY27 respectively which will enable our Company to get better terms from our service providers. This would help us to avail additional discounts and negotiate with our service providers on better price to our advantage.

GLOBAL ECONOMIC OVERVIEW

INTRODUCTION

The world economy remained robust in 2023, and inflation declined more quickly than anticipated. But growth varied from country to country; most European nations suffered a dip, while the US and a few of emerging-market economies saw notable gains. The decrease in GDP growth was caused by more restrictive financial conditions as well as less international trade.

It is anticipated that the growth of the global GDP will decrease from 3.1% in 2023 to 2.9% in 2024, and then accelerate to 3.0% in 2025. High consumer spending and a strong labor market are projected to support the US economy even as growth rates are predicted to drop. It is anticipated that the Euro Area will first slow down before picking up speed, whereas China's GDP will slow down as a result of weak consumer demand, high levels of debt, and a sluggish real estate market.

Most G20 countries are expected to see target levels of inflation by the end of 2025, with headline inflation expected to decline from 6.6% in 2024 to 3.8% in 2025. Underlying price pressures are yet unknown, though. Short-term threats to inflation and activity include persistent pressure on service pricing and geopolitical concerns that disturb the oil markets. Prior policy rate increases could have an effect on GDP growth and inflation.

Global Prospects

The world economy is predicted to fall by 2.4% in 2024, which would be the third year in a row of declines. Numerous causes, such as strict lending rules, high inflation, tight monetary policy, and a drop in foreign trade and investment, are blamed for this collapse. While some emerging markets and developing economies (EMDEs) are showing indications of improvement, major economies are growing slowly due to increased global risks resulting from geopolitical tensions, especially the wars in the Middle East and Ukraine.

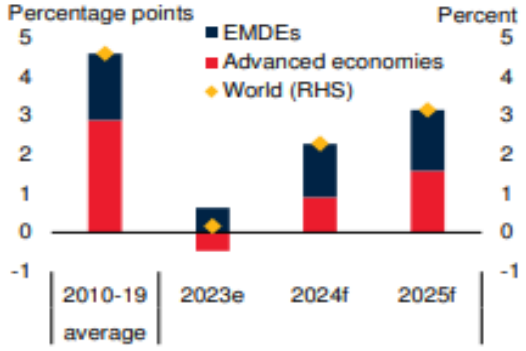
Due to Russia's invasion of Ukraine, there is now more uncertainty in the Middle East, which is having an effect on global financial markets, commerce, and confidence levels. Concerns have also been raised about the possible rise in energy costs, which would jeopardize the stability of the world economy.

Long-term inflation in industrialized countries carries hazards in addition to these difficulties since it has the potential to tighten financial conditions and obstruct macroeconomic stability. Further dangers to the global economic recovery include network fragmentation and tighter trade restrictions. In addition, the effects of climate change may accelerate, increasing the likelihood of severe and frequent natural catastrophes as well as the severity of extreme poverty.

Decisive structural changes are necessary to address these issues and rekindle sustainable growth. Infrastructure development, human capital investments, and trade and financial liberalization should be the top priorities for these reforms. Long-term economic resilience also requires tackling gender inequality, raising the labor force participation rate, and encouraging innovation.

It is essential to carefully evaluate policy packages before implementing them in order to minimize any possible slowdown in growth and guarantee economic stability. Policymakers may create the conditions for a more robust and prosperous global economy by implementing comprehensive plans that address both immediate problems and long-term structural difficulties.

Contributions to Global Trade Growth



Global Growth

(*Source: Global Economic Prospects -- January 2024)*

Global Risk and Policy Challenges

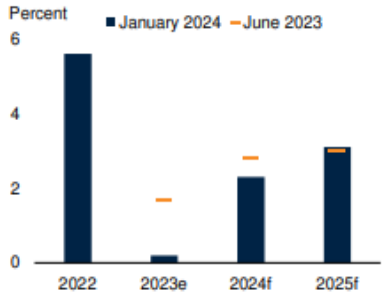
There is a chance that upward inflationary pressures will cause notable adjustments to the value of financial assets, given the recent increases in policy rates. Geopolitical tensions exacerbate this worry, especially in light of the ongoing Middle East war brought on by Hamas's operations against Israel. Transport routes for gas and oil from the area could be disrupted, which would worsen supply constraints and drive up energy costs, which would hurt the GDP and put more pressure on inflation.

Furthermore, the anticipated reduction of inflation in the service sector may require attention if the mix of robust nominal wage growth and sluggish productivity continues, or if profit margins do not contract as anticipated. The entire amount to which prior policy rate hikes have reduced demand is yet unknown, as are any potential long-term effects on employment and GDP, especially in economies that rely significantly on credit. Rising interest rates are contributing to an increase in debt servicing obligations, especially for enterprises that profited from low borrowing costs prior to 2022 or in countries with fixed-rate home loans.

Global Trade

In 2023, global trade grew by only 0.2%, the worst rate outside of recessions in 50 years. The steep slowdown in industrial production across advanced economies and EMDEs was reflected in the contraction of goods trade, which was the first continuous decrease outside of a recession in 20 years. Pressures on the global supply chain returned to their pre-pandemic levels as the trade of products slowed and the effects of the pandemic subsided. Growth in services trade also decreased after a brief post-pandemic uptick.

Global Trade Growth



After lagging behind global output in 2023, trade is predicted to climb by 2.3% in 2024, indicating a return to normalcy following the previous year's collapse. However, trade's responsiveness to global output is expected to remain subdued in the near future due to the decreased investment, which is more trade-intensive (WTO 2023). In 2024, international travel is expected to reach pre-pandemic levels, barring any delays in certain countries' reopening.

(Source: Global Economic Prospects -- January 2024)

Due largely to slower-than-expected development in China and global investment, the projection for the growth of global commerce has been lowered downward by 0.5 percentage points since June. As a result, the trade recovery that is currently predicted for 2021–2024 is the worst that has occurred in the 50 years after a global recession. Geopolitical uncertainty, especially in light of the ongoing armed conflicts, and the possibility of a longer-lasting recession in China provide negative risks to the trade outlook. There's also the chance that more measures will be taken to block trade with other countries. If this trend continues, supply networks may become more dispersed and commerce may grow more slowly than the baseline forecast.

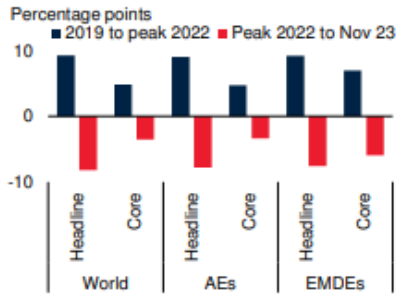
Global Inflation

Global headline consumer inflation fell sharply in 2023 as a result of declining food and energy prices, a slowdown in the demand for products, and improving supply chains. Nonetheless, approximately half of emerging and developing economies target inflation, while most advanced economies continue to experience above-target inflation. The demand rotation from goods to services persisted in the main advanced economies, with reducing inflation in goods being somewhat countered by sticky inflation in services due to tight labor markets. Because services inflation has shown to be more persistent than headline inflation, core inflation has also seen a more moderate decrease from its 2022 peak.

The plunge in core inflation has transpired in notably diverse growth environments across nations. Disinflation has coincided with robust activity and low unemployment in the US, in part because of

improved supply chains, a decrease in the price of oil, and a labor supply shortage. Weak growth accompanied the drop in inflation in the euro area, which was a reflection of the negative supply shocks caused by the prior large increases in energy prices. As GDP slowed last year, headline and core inflation declined in the majority of EMDEs. However, along with currency depreciations, inflation remained extremely high in nations experiencing financial strain.

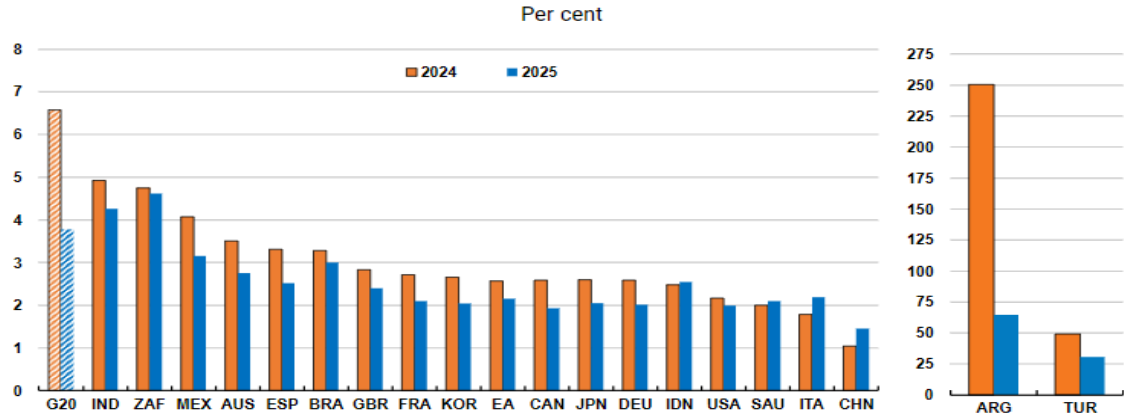
Evolution of Headline and Core Inflation since 2019



(Source: Global Economic Prospects -- January 2024)

Global inflation is anticipated to decline even more in 2024–2025 as a result of slower-than-expected increase in global demand and lower commodity prices. The combination of tight credit and financial conditions and contracting labor markets has resulted in low demand. The predicted decline in global headline inflation is to reach 3.7% in 2024 and 3.4% in 2025, which is little higher than the pre-pandemic average but closer to central bank targets. Expectations for inflation by 2022 show a slow decline, although it will still be higher than levels prior to the epidemic. Consensus projections indicate that inflation will be lower this year than it was last year in 85% of EMDEs.

Inflation Expectations



(Source: OECD Economic Outlook, Interim Report February 2024 : Strengthening the Foundations for Growth | OECD iLibrary)

Financial Developments

With expectations of a gradual reduction of policy interest rates, monetary tightening in advanced economies is coming to an end. This pattern, along with a decline in inflation, may maintain high real policy rates for a long time after the US experienced large rate rises not seen since the early 1980s. While the US credits its restrictive monetary policy for better-than-expected GDP results, the euro area has been significantly impacted by persistent core inflation.

October saw a sharp increase in government bond yields in advanced economies, reflecting both the expectation for policy rates and volatile term premia, to levels not seen since the late 2000s. Even while rates have considerably decreased, they are still high, which puts pressure on governments' and businesses' capital expenses to rise when debt is refinanced.

The advanced economy banks report tight lending requirements and steep drops in bank credit growth, indicating high financing costs in the credit markets. Despite an increase in credit card delinquencies and corporate bankruptcies, private sector debt-service ratios are still largely manageable because of the quantity of debt that has been issued at low fixed rates, particularly in China.

The financial markets of industrialized economies have maintained a strong appetite for risk, which helps counteract the tightening effect of rising interest rates. Corporate credit spreads have mostly

remained below the median values of the preceding two decades, and equity volatility has been muted.

A number of central banks in emerging market and developing economies (EMDEs) have started lowering policy rates, and more cuts are expected, particularly in Europe and Latin America. Due to factors like better-than-expected growth, minimal current account vulnerabilities, and dropping inflation following proactive monetary tightening, most EMDEs have not encountered severe financial hardship despite rising interest rates.

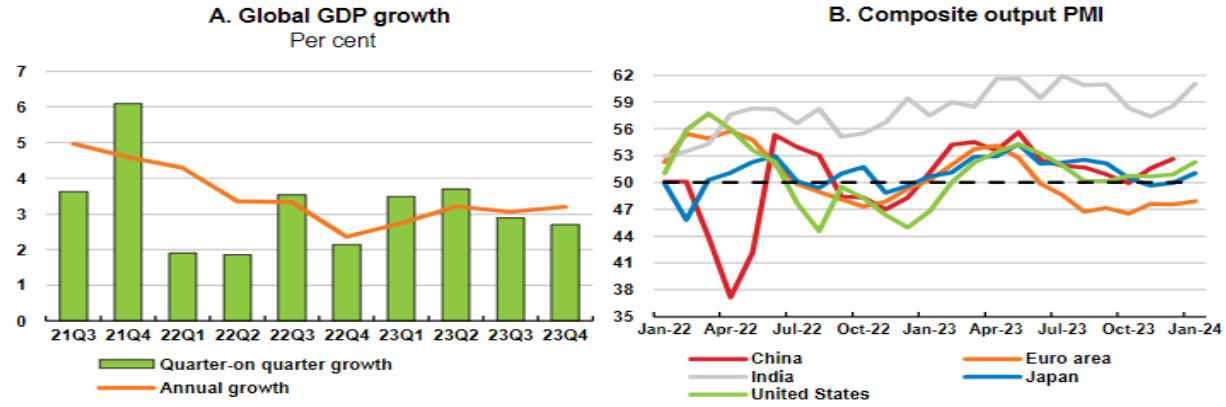
About one in four EMDEs have negative credit ratings. These economies have been unable to issue international bonds for the last two years due to unaffordable high financing costs and restricted access to market-based financing. These nations, in contrast to other EMDEs, saw significant currency depreciation last year, to levels frequently linked to currency crises.

Recent Developments and Outlook

In a startling reversal of events, real incomes declined and widespread monetary tightening did not stop the previous year's impressive global output growth from defying early recession projections. Inflation fell faster than anticipated, despite energy assistance programs supporting household incomes and boosting local economies across a large number of locations. The US emerged as the global growth leader, driven by strong consumer spending and increasing government investment spurred by the depletion of epidemic savings. But other developed economies, especially those in Europe, had less fortunate results because of their reliance on bank-based funding and ongoing energy price shocks. Meanwhile, growing employment, better macroeconomic policies, and infrastructure spending helped emerging-market economies maintain robust growth rates.

Global growth has started to slow down, demonstrating the ongoing differences between nations. High-frequency activity indicators show that growth is continuing at a moderate rate, with services expanding more quickly than manufacturing.

Global growth has started to ease with continued divergence across countries.



(Source: OECD Economic Outlook, Interim Report February 2024 : Strengthening the Foundations for Growth | OECD iLibrary)

International trade is improving, albeit slowly, thanks to rising auto sales and a slow but steady expansion in electronics and semiconductor manufacturing in Asia. The increase of commerce in services has also been aided by the return of international passenger travel to pre-pandemic levels. New supply interruptions are starting to appear, though, and export order indicators—especially in manufacturing—remain low.

Attacks on ships in the Red Sea have hampered trade, which has led to a sharp increase in shipping costs and lengthier delivery times, particularly from Asia to Europe. Production schedules in Europe have been impacted by this disruption, especially for automakers. A 100% rise in shipping costs has been found by the OECD to boost annual OECD import price inflation by more than 5%, which after around a year would add 0.4 percentage points to consumer price inflation.

In 2023, headline and core inflation declined as the inflation of food and energy prices declined and monetary policy tightened. The majority of countries saw a decrease in the inflation of goods prices as a result of better supply chain dynamics and cheaper energy commodity prices. Nonetheless, the inflation of service prices persisted and decreased gradually. Disinflation was caused by a number of variables, including demand- and supply-driven aspects, which reduced private sector expectations for inflation in the near future. However, most nations' core inflation was over target, indicating continued uncertainty about the length of the inflationary cycle that started in 2021.

Disinflationary forces are either diminishing or reversing, such as falling commodity prices and prior improvements to the supply chain, but inflation risks from shocks, harsh weather, and geopolitical uncertainties still exist. Many nations retain low unemployment rates despite declining inflation rates, suggesting a possible "soft landing." Indicators of the labor market point to a slowing in employment growth, a stabilization or minor reduction in the total hours worked, and a balance between supply and demand.

With the recent improvement in global financial circumstances, sooner and quicker policy rate reduction are expected. Conditions are still tight, nevertheless, with negative credit growth in the face of rising lending rates and tighter credit criteria, as well as long-term real interest rates that are similar to levels seen prior to the global financial crisis. The tightening of monetary policy is still having an effect on the housing market; while prices are stabilizing in certain nations, transaction volumes are significantly declining. This pattern is a reflection of fundamental problems like the shortage of homes and the fast population expansion. However, lower transaction volumes raise the prospect of more price reductions in the event that more owners are forced to sell. Reduced transaction volumes have also been observed in the commercial real estate markets as a result of increased financing costs and changes in work schedules after the epidemic.

INDIAN ECONOMIC OVERVIEW

India surpassed the United Kingdom to become the world's fifth-largest economy in the first quarter of FY23, recovering strongly from the impact of the COVID-19 epidemic. The GDP at current prices for Q2 of 2023-24 was ₹ 71.66 trillion (US$ 861.2 billion), up from ₹ 65.67 trillion (US$ 789.2 billion) in Q2 of 2022-23, representing a 9.1% growth rate. Robust domestic demand for consumption and investment, combined with the governments continued emphasis on capital expenditure, were key drivers of GDP growth in the first half of FY24. From April to December 2023-24, India's service exports totaled US$ 247.92 billion, while overall exports (services and products) were US$ 565.04 billion. With employment on the rise and private consumption continuously expanding, boosted by a jump in consumer confidence, India's GDP growth is likely to stay strong for the foreseeable future.

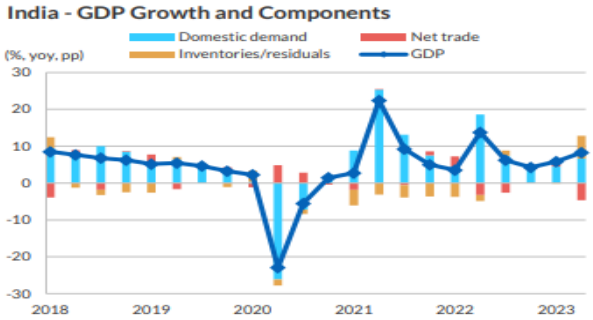
Future government capital spending in the economy is predicted to be supported by variables such as tax buoyancy, a streamlined tax system with low rates, a full evaluation and rationalization of the tariff structure, and tax filing digitization. In the medium term, greater capital investment on infrastructure and asset-building projects is expected to boost growth multipliers. The contact-based services sector has shown a strong potential for expansion by releasing pent-up demand. A number of HFIs (High-Frequency Indicators) that are doing well reflect the sector's success, signaling the start of a recovery.

India has emerged as the world's fastest-growing major economy, and it is predicted to be one of the top three economic powers over the next 10-15 years, thanks to its strong democracy and alliances.

India's appeal as an investment destination has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and record amounts of money raised by India-focused funds in 2022 demonstrate investor confidence in the "Invest in India" narrative.
(Source: https://www.ibef.org/economy/indian-economy-overview)

Despite a difficult global environment, India's economy is still resilient, and it is expected to grow at the highest rate among major emerging markets. The GDP increased 7.6% year over year on a non-

seasonally adjusted basis in 3Q23, surpassing our forecast of 6.0% year over year growth. This growth outturn was better than anticipated. Government investment and spending contributed to the growth spurt, with low consumer demand and a decline in the services and agricultural sectors offsetting some of these factors.



(Source: Global Economic Outlook - December 2023)

We now anticipate fiscal year (FY) 2023–2024 to be 6.9% instead of the 6.3% we had anticipated, given the strength in 2Q23 and 3Q23. The sales of cars have increased, e-way bills—permission required for the interstate and intrastate transportation of goods—reached an all-time high in October, and retail sales are still robust, all of which are high-frequency indicators of continued near-term economic growth. Although this still indicates a deceleration from our prediction for the current fiscal year, we have not altered our growth projections for the outer years. 6.5% growth in FY24–25 would be indicative of some external weakness as well as the overall effects of previous monetary tightening.

October saw a greater than anticipated slowdown in inflation, falling to 4.9%, comfortably within the 2%–6% CPI tolerance range set by the Reserve Bank of India (RBI). However, in light of the recent weeks' steady rise in the daily cost of staple goods like tomatoes, we have kept our end-2023 projection of 5.5%. This year's July and August headline inflation spike was mostly caused by sharp rises in tomato prices. Furthermore, food price shocks may still have an impact on headline inflation in the near future due to the possibility of the El Niño weather pattern. Next year, we anticipate further declines in core CPI and a slowdown in headline inflation, albeit with continued volatility. Already, core inflation is slightly higher than the 4% RBI target.

From February 2023, the RBI has maintained policy rates at 6.5%, and we anticipate that they will stay that way until 2Q24. The RBI governor stated in a speech in late October that "the outlook on food inflation is beset with uncertainties," reflecting the bank's recent aggressive communication. November remarks that "headline inflation remains vulnerable to recurring and overlapping food price shocks" came after that. Additionally, the RBI has increased its growth estimate for Fiscal Years 2023–2024.

IT INDUSTRY

Global Overview

The market for information technology has expanded significantly in recent years. At a cumulative

annual growth rate (CAGR) of 6.2%, it will increase from $8508.63 billion in 2023 to $9039 billion in 2024. Increased personal computing, the widespread adoption of the internet, the mobile revolution, software development breakthroughs, the open-source movement, and growing cyber security concerns were the main drivers of the rise seen during the historic period.

Over the coming years, there will likely be a significant increase in the size of the information technology market. At an 8.3% compound annual growth rate (CAGR), it will reach $12417.21 billion in 2028. The development of smart cities, cyber security advancements, digital transformation, worldwide IT services, and changing e-commerce are all critical to the projected growth. Throughout the projection period, the information technology sector is anticipated to be significantly influenced by the growing demand for cloud computing services. With cloud computing, data storage is done online via a service offered by cloud computing providers, who also handle and run data storage as a service. These days, a lot of businesses use cloud-hosted apps for daily operations. In 2021, cloud data centers are expected to handle 94% of enterprise workloads, according to information provided by hostingtribunal.com. This pattern shows how people's preferences for cloud-based data storage are developing, which is a major factor in the rise in demand for information technology.

The increasing use of Internet of Things (IoT) devices is driving the information technology market's expansion. The term "Internet of Things" describes a network of real-world items that have been fitted with sensors, software, and networking features that allow them to gather and share data online. Information technology, which offers the required infrastructure, connection, security, and analytics capabilities, is essential to the effective deployment, management, and use of IoT devices. For example, research released in January 2022 by the GSM Association predicted that the number of IoT connections worldwide will increase significantly from 15.1 billion in 2021 to 23.3 billion by 2025. The significant rise in IoT device adoption is one of the main factors propelling the information technology market's expansion.

In 2020, the COVID-19 pandemic produced a great deal of disruption in the information technology business, mostly because of supply chain disruptions and the move toward remote work brought on by worldwide lockdowns. Governments took action to stop the spread, which resulted in a decline in economic activity and a large number of lockdowns. Over the course of the projected year, a recovery in the IT sector is anticipated despite these obstacles. Low-cost open-source substitutes have also become more prevalent, and businesses are deliberately utilizing open source to strengthen their position in the market. For example, Y Combinator-incubated firm Supabase raised $6 million to create new open-source tools, demonstrating ongoing support for and interest in open-source projects.
In terms of the information technology (IT) market, Asia-Pacific was the largest region in 2023. The second-largest information technology market region was North America.

IT services, computer hardware, telecom, and software products are the main categories of IT. Computer hardware includes parts found in PCs and laptops that are necessary for a computer system to function. These services are provided to businesses in a range of industries, including manufacturing, healthcare, retail, financial services, and more.

Global ERP Software Market

The size of the enterprise resource planning market is projected to be USD 65.25 billion in 2024 and USD 103.95 billion by 2029, with a compound annual growth rate (CAGR) of 9.76% likely to occur throughout this forecast period.

The increasing need for cloud-based ERP platforms and supplier and customer relationship management, driven by a sharp increase in the number of firms globally, is driving the market's expansion.

The need for ERP software, especially cloud-based, is being driven by a number of noteworthy aspects, including the growing acceptance of new and emerging technologies, the expansion of the value of current ERP systems, the reduction of third-party dependencies, the need for more highly secured resources, the advancement of financial systems, and others.

The growing requirement for a customer-centric strategy is driving the enterprise resource planning (ERP) market.

More and more companies are discovering how important it is to center their operations on the needs of their customers in order to boost customer satisfaction, loyalty, and overall business success. Because ERP systems provide a wide range of integrated applications that enable firms to boost productivity, streamline workflows, and improve customer service, they are crucial to achieving this goal.

ERP (Enterprise Resource Planning) software is becoming more widely used by large organizations, which are generally described as those with more than 250 people, in order to facilitate collaboration and communication between different departments and staff members. ERP makes it easier for these businesses to share data and information in real time.

Single-tenant cloud-based ERP software systems are becoming more popular among big businesses, according to recent trends. These systems provide distinct software instances for every user, hosted on hardware that is specifically designated within the public infrastructure. Users have more power and more options for customization with this system.

ERP systems, like those provided by SAP, are designed to help big businesses efficiently manage their regional operations. ERP software helps automate production and supply chain processes, especially in manufacturing industries, which promotes segment growth.

However, adopting sophisticated ERP solutions is expensive, thus major businesses with sizable IT budgets are the main businesses that can afford them. Such enterprises need a huge staff of technical specialists and consulting services to implement ERP programs. Furthermore, implementing ERP solutions across several sites is a common practice for major organizations, which increases implementation complexity.

North America holds the largest market share for ERP software. The growing popularity of products like Microsoft Dynamics 365, Oracle NetSuite, and Oracle ERP Cloud is propelling the ERP software industry in the US. Large businesses looking to gain a competitive edge and combine company activities use these platforms.

In the ERP software market, where industry digitization is driving competition, a few major competitors hold a dominant position, namely SAP SE, Intuit, Microsoft Corporation, and Constellation Software. The industry is semi-consolidated, and vendors are maintaining intense competition by capitalizing on their market penetration and capacity to invest in new technology.

Indian Overview

By 2025, the IT sector is predicted to have contributed 10% of India's GDP, up from 7.4% in FY22. With industry after industry adopting cutting-edge digital applications, India is now well up for the next stage of its IT revolution. With 76 crore people now having access to the Internet, India is seen by the rest of the globe as having one of the largest Internet user bases and the lowest Internet rates.

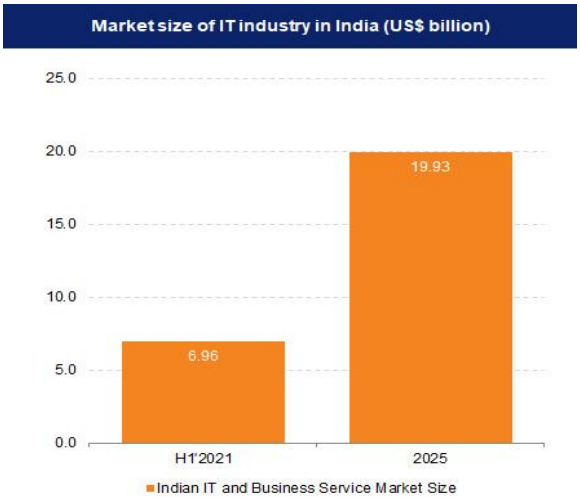
Thanks to the Digital India Programme's improved digital access and strong foundation of digital infrastructure, the focus is currently on the creation of substantial economic value and citizen empowerment. India is among the nations where digital adoption is happening at the fastest rate. This was achieved through a combination of public policy, private sector innovation and investment, and new digital applications that are already enhancing and penetrating a range of activities and occupations, improving individuals' daily lives.

In the 2022 edition of the Global Innovation Index, India's rankings rose six spots to 40th place (GII).

The Indian IT industry's revenue reached US$ 227 billion in FY22, a 15.5% YoY rise, and was predicted to reach US$ 245 billion in FY23, according to the National Association of Software and Service Companies (Nasscom). The domestic IT and business services market in India was estimated to be worth US$ 13.87 billion in 2022, growing at a rate of 7.4% YoY from 7.2% in 2021.

India's IT expenditure is predicted to rise from an anticipated US$ 81.89 billion in 2021 to US$ 110.3 billion in 2023. By 2025, it's anticipated that the Indian software product market would be worth $100 billion. In order to improve their global delivery centers and increase their global presence, Indian businesses are concentrating their investments abroad.

In FY20, the Indian market for data annotation was valued at US$ 250 million, with the US market accounting for 60% of the total market share. By 2030, the market is anticipated to reach US$ 7 billion as a result of the growing local demand for AI.



(Source: Information Technology India - IBEF)

By 2026, the Indian IT sector is expected to generate US$ 350 billion and account for 10% of the GDP of the nation, according to a forecast by Infomerics Ratings.

India's IT export earnings are estimated to have increased to US$ 194 billion in FY23, or 9% in constant currency terms. The largest contributor, making up almost 53% of all IT exports (including hardware), has been the export of IT services.

OVERVIEW OF EDUCATION INDUSTRY

Global Overview

According to Morgan Stanley Research, throughout the next ten years, technology will be a major factor in changing the worldwide education sector. Analysts predict that consolidation, scale, and efficiency—rather than just expansion—will propel the education market's potential $8 trillion rise from $6 trillion in 2022 to $8 trillion by 2030. The influence of the creation of the printing press in the fifteenth century is analogous to the growth of education, according to Stephen Byrd, Global Head of Sustainability Research at Morgan Stanley.

Although a number of industries, including education, are being negatively impacted by persistently high inflation, it is anticipated that public and private spending on education will fall from 5.9% of global GDP in 2022 to 5.3% by 2030. With estimated spending of $4.3 trillion by 2030, the Kindergarten to class 12 category is expected to be the largest and fastest-growing, fueled by rising costs for after-school and supplemental education as well as population expansion in emerging nations.

Expected to exceed $2.4 trillion in spending by 2030, higher education represents the second-largest segment with strong development prospects in lower- and middle-income countries. But as technology advances, there may be deflationary pressures on college tuition, which could restrain the expansion of spending in this area.

It is projected that education technology (edtech) would receive more attention as private capital becomes a bigger portion of education spending. Edtech is positioned to enable both in-classroom and remote learning, lowering costs and improving accessibility by fusing IT tools and educational practices. With expenditure on edtech expected to rise from $250 billion in 2022 to $620 billion in 2030, Morgan Stanley predicts that it will exceed the education sector as a whole. This growth will be fueled by scalable business models, improved internet access, and rising technology usage.

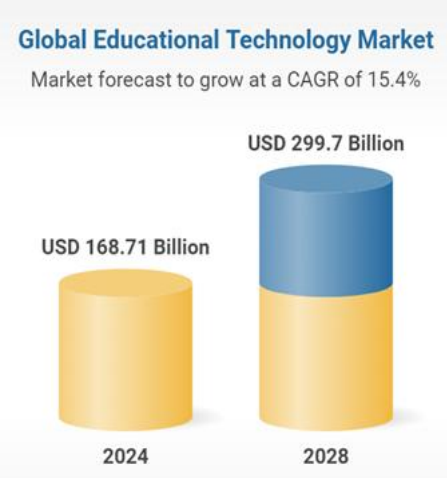
Global EdTech Industry



(Source: Research and Markets)

The market for educational technology is expected to develop at a compound annual growth rate (CAGR) of 15.4%, reaching a projected size of $299.7 billion by 2028. This growth is ascribed to a number of factors, such as the incorporation of gamification and simulation into educational practices, the growing demand for remote and hybrid learning solutions, the increased emphasis on digital literacy in educational institutions, and increased investment in educational technology startups.

The development of educational chatbots and virtual assistants powered by artificial intelligence (AI), the use of blockchain for safe academic credentialing, improvements in educational software and applications, technological advancements in hardware devices customized for educational settings, and the integration of virtual and augmented reality into educational settings are some of the major trends that are expected to occur during the forecast period.

One major factor propelling the growth of the educational technology market is the increase in demand for online learning environments. These digitally interfaced platforms provide a range of tools, courses, and educational materials that enable studying outside of typical classroom settings. As an illustration of the rising demand for online education, the number of registered users on the online learning platform Coursera increased significantly from 71 million in 2020 to 92 million in 2022.

Furthermore, the market for digital remittances is anticipated to be further stimulated by the increasing ubiquity of smartphones. Using a smartphone to access interactive content and instructional tools conveniently improves learning experiences. By 2025, there will be 68.3 million people living in the UK, of which 95% are estimated to own smartphones. This means that more people will be using mobile educational technologies. Modern technology is gaining a lot of traction in the educational technology sector, and big businesses are aggressively implementing new innovations to stay competitive.

Instructure Inc., Microsoft Corporation, Alphabet Inc., IBM Corporation, Oracle Corporation, Pearson PLC, upGrad Education Private Limited, Blackboard Inc., Udemy Inc., Coursera Inc., Promethean World Ltd., Smart Technologies, Outschool, Byju's, Udacity Inc., Chegg Inc., E-Zest Solutions Ltd., Kahoot!, Hurix Digital, edX Inc., TutorMe, Codecademy, Nearpod, Quizlet, Edmentum Inc., Khan Academy, BrainPOP, and Knewton Inc. are some of the major companies featured in the educational technology market report.

Indian Overview

Foreign Direct Investment (FDI) inflows into the education sector totaled $9.44 billion between April 2000 and September 2023. India's vast English-speaking population makes educational offerings more accessible, with some Indian universities rating highly in worldwide university rankings.

The National Education Policy (NEP) and schemes like RISE and EQUIP are government efforts aimed at addressing difficulties and improving educational quality. The NEP focuses on high-quality vocational education and includes plans to construct regional and national institutes, schools, and residential schools.

Recent developments include the release of the National Curriculum Framework for School Education (NCF) and the approval of the New India Literacy Program. The National Commission for Women runs capacity-building programs for female students, and STEM-focused edtech businesses work with the government to promote STEM education.

Rise of EdTech Industry in India

India is becoming the world's Ed Tech capital; seven of the 36 Ed-Tech unicorn businesses are Indian, with a valuation of $34.05 billion in June 2022.

Education has always been a key area in India's development and progress, and the government has always prioritized establishing education programs to increase opportunities in this industry. COVID-19 hit the country in 2020, and future lockdowns raised the visibility and necessity for a hybrid model of education, resulting in the global rise of ed-tech businesses. This was the time when ed-tech companies rose to prominence, and students began to use their services, leading in the development of operations, which eventually led to increased income and growth for enterprises. Their expansion is not just confined to the diversification of their products; it also comprises a series of mergers and acquisitions to target the global market.

There is a significant chance for India's Ed-tech business to grow to a US$ 10 billion economy by 2025. Numerous factors have contributed to the growth and spread, including high internet and smart device penetration, increased online content consumption, and a desire for young trained individuals in the workforce.

Since COVID-19, the ed-tech industry has grown significantly, while the education industry has suffered. The necessity for technological advancement in the present traditional educational system has resulted in more enterprises entering this industry and providing better services. According to the PGA Labs and IVCA analysis, India's education sector is predicted to rise from US$ 117 billion in 2020 to US$ 225 billion in 2025.

Several significant factors contribute to the growth of India's ed-tech industry:

- High Internet Penetration: With the estimated number of active internet users expected to reach 900 million by 2025, aided by the growing use of smartphones, access to online education becomes more common.
- High Smart Device Penetration: The growing use of smart and linked devices, particularly IoT devices, builds a long-term network of digital users, improving access to online educational resources.
- Increasing Online Content Consumption: The popularity of online content development, particularly in video format, is appealing to Indian audiences. As video consumption grows, so will the demand for online educational content.
- Young Employable Population: With a large proportion of the population of working age, there is an increasing demand for skill development and certification programs to improve employability.
- Increased Demand for Skilled Professionals: Emerging technologies such as machine learning, artificial intelligence, and blockchain are offering new career opportunities, but they demand certain skill sets. This creates a demand for individuals to upskill and acquires new competencies via online learning platforms.

These characteristics, taken together, contribute to the growth trajectory of India's ed-tech industry, making it a promising sector with great room for additional expansion and innovation.

While edtech as a sector has expanded dramatically over the last decade, the actual impact of its effective use is only now becoming apparent. EdTech has had a huge impact on the way knowledge is accessed, from e-learning platforms and student engagement tools in the classroom to skill development and continuous learning opportunities in higher education. Furthermore, good government policies and technological breakthroughs resulting from widespread internet usage and the introduction of 5G have hastened the sector's change.

Top Ed-tech trends shaping education in the near future-

- Augmented Reality and Virtual Reality technologies are increasing popularity, providing immersive and practical learning experiences in a variety of fields including STEM, medical

procedures, arts, and technical education. These technologies provide students compelling learning environments and unique approaches to understanding complex subjects.

- Artificial intelligence (AI) tools and technology are being integrated into education to allow for speedier grading, individualized learning experiences, intelligent content distribution, and tutoring programs. The collaboration between AI and human teachers attempts to increase teaching effectiveness and student performance.
- Customized learning strategies based on individual students' skills, needs, talents, and interests are gaining popularity. This approach recognizes that each student learns differently and at their own pace, shifting away from the old one-size-fits-all model and toward personalized learning experiences.
- Educators are promoting holistic development, which includes developing kids' academic performance as well as their social, emotional, and problem-solving abilities. Holistic education seeks to prepare students for life's problems and provide them with the necessary skills for professional success.
- There is a rising emphasis on fostering entrepreneurial principles and skills in pupils at an early age. Educators are developing curricula and teaching approaches to encourage an entrepreneurial attitude in children, allowing them to acquire inventive thinking, problem-solving skills, and adaptability for future success.

The COVID-19 epidemic has pushed the acceptance of these principles, emphasizing the value of adaptability, innovation, and technology in education. Effective procedures established during the epidemic have laid the groundwork for the school system to handle future emergencies with little disruption. EdTech is projected to play a critical role in propelling these trends ahead, creating a more dynamic and forward-thinking educational ecosystem in India.

-Education ERP Software (https://www.financialexpress.com/jobs-career/education-future-of-erp-system-in-india-implementation-challenges-and-solutions-2486737/)

For several years, the education industry has seen drastic changes, such as the shift from pen and paper to smartphones, tablets, and computers for teaching and learning. There is still much space for improvement in the education system for both students and teachers, with all procedures being easy, efficient, and relevant. Student involvement is one of the most significant difficulties schools face. Nonetheless, schools are focusing on developing a centralized Enterprise Resource Planning (ERP) system to manage the numerous aspects of the school and education system.

According to the most recent Modor Intelligence analysis, the global ERP market size for schools was $8.05 billion in 2020 and is expected to reach $18.82 billion by 2026, rising at a CAGR of 16.2%. According to the survey, APAC, particularly India, is the fastest-growing market. It goes on to claim that schools are keen to join the ERP revolution and will assist the global market evolve over time.

Education ERP Software is a web-based integrated application built for educational institutions such as schools and colleges. It enables the automation of all critical processes inside a business and serves as the foundation for a comprehensive Management Information System. Education institutions are dealing with a large amount of data and information. Maintaining the date and time of processed information is a time-consuming activity when processing and storing huge amounts of data and information in the form of records.

Furthermore, educational institutions oversee exams, admissions, accounts, web portals, school supply procurement, and personnel, all of which necessitate rigorous attention to detail. This program gives the institution comprehensive control over all procedures and activities, allowing it to remove any issues that develop during operations. However, this program gives remarkable performance in terms of efficiency and workflow.

The prerequisites are difficult for schools to determine. Schools have another hurdle in the form of training programs. The workforce is averse to new systems because they do not want to disrupt their everyday routines. A comprehensive training program is required to persuade them to use the new school ERP system. Education verticals have distinct limits that must be addressed separately. A lack of infrastructure to manage the ERP system is another issue. Because ERP systems are expensive, many schools refuse to install them.

ERP software is an ideal digital solution for educational institutions. Personnel, exam information, fee accounts, web portals, Management Information System (MIS), and library volumes are all easily manageable. ERP software provides total control over all activities in educational institutions and connects all departments such as academics, finance, administration, infrastructure, and communication. This facilitates information interchange between departments and ensures that all information is saved on a central server and available at all times.

ERP solutions are particularly advantageous for schools since they assist in making important decisions in a highly competitive industry. Complete controls over day-to-day operations, as well as the capacity to provide informative reports, are unquestionably the best ways to gain a competitive advantage quickly.

In a word, artificial intelligence (AI) and cloud computing are the driving forces that enable kids to be the best versions of them while also benefiting instructors. As a result, deploying educational technology, such as an ERP system, benefits all stakeholders. It undoubtedly has a bright future for educational institutions, and according to facts and latest reports on edTech, it will be on the rise by the end of 2022.

The NEP 2020 replaces the National Policy on Education of 1986. The NEP was implemented to create wonders and reforms for the standard Indian Education System. The NEP 2020 aims to transform the nation and make India

a Vishva Guru (global knowledge superpower) by encouraging the growth of a student's academic, artistic, social, physical, emotional, ethical, and moral facets in an organized framework. It determines the circumstances in which a promise made by the parties to a contract shall be legally binding on them. Each contract creates some rights and duties upon the contracting parties. The Contract Act deals with the enforcement of these rights and duties upon the parties. The Contract Act also lays down provisions of indemnity, guarantee, bailment, and agency. Provisions relating to the sale of goods and partnerships which were originally in the Act are now the subject matter of separate enactments viz., the Sale of Goods Act, 1930 and the Indian Partnership Act 1932. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honoured and that legal remedies are made available to those who are affected.

The Consumer Act sets out a mechanism for consumers to file complaints against, inter alia, service providers in cases of deficiencies in services, unfair or restrictive trade practices, and excessive pricing. A three-tier consumer grievance redressal mechanism has been implemented pursuant to the Consumer Act, at the national, state, and district levels. Further, the Consumer Act established a Central Consumer Protection Authority to promote, enforce, and protect the rights of consumers. If the allegations specified in a complaint about the services provided are proved, the service provider can be directed to inter alia remove the deficiencies in the services in question, return to the complainant the charges paid by the complainant, and pay compensation, including punitive damages, for any loss or injury suffered by the consumer. Non-compliance with the orders of the authorities may attract criminal penalties in the form of fines and/or imprisonment.

Competition Act, 2002

The Competition Act, 2002 aims to anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The act deals with the prohibition of agreements and anti-competitive agreements. No enterprise or group shall abuse its dominant position in various circumstances as mentioned under the act. The Consolidated financial statements related to and its associate entity viz Infinity Transoft Solution Private Limited (Together would be called as "Group"). The Consolidated Financial Statements have been prepared on the following basis:

Investments in associates are accounted for using the equity method. An associate is an entity over which the Group is in a position to exercise significant influence over operating and financial policies. The considerations made in determining whether significant influence is being exercised are similar to those necessary to determine control over the subsidiaries.

The Group's investments in its associate are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date.

The Statement of Profit and Loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the Statement of Changes in Equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

If an entity's share of losses of an associate equals or exceeds its interest in the associate (which includes any long-term interest that, in substance, form part of the Group's net investment in the associate), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognized

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the Statement of Profit and Loss.

The consolidated financial statement has been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented to the extent possible, in the same manner as the company's separate financial statements.

1.3.2 Fair Value Measurement

Some of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. This includes a financial reporting team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values.

The financial reporting team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as pricing services, is used to measure fair values, then the financial reporting team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which the valuations should be classified.

Fair values are catego0rised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

1.3.3 Current and Non-Current Classification

The Company presents assets and liabilities in the Balance Sheet based on Current /Non- Current classification.

An asset is treated as Current when it is –
- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:
- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.
Deferred tax assets and liabilities are classified as non-current assets and liabilities.

1.3.4 Property, Plant and Equipment

(a) Tangible Assets

Property, Plant and Equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.
Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Property, Plant and Equipment which are significant to the total cost of that item of Property, Plant and Equipment and having different useful life are accounted separately.

Other Indirect Expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre-operative expenses and disclosed under Capital Work-in-Progress.

Depreciation
Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Based on technical evaluation carried out by management, depreciation on fixed assets has been provided on the Written down value method as per the useful life and residual value prescribed Schedule II to the Companies Act, 2013. Residual value has been assessed at 5% of cost of the assets.

Depreciation and amortization on addition to fixed assets is provided on pro-rata basis from the date the assets are ready for intended use. Depreciation and amortization on sale/ discard from fixed assets is provided for up to the date of sale, deduction or discard of fixed assets as the case may be.

Individual assets costing Rs. 5,000 or below are depreciated/ amortized in full in the year of purchase. Depreciation/ Amortization method and useful lives are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the depreciation/ amortization period is changed accordingly.

Asset	Useful Life
Computer	3years
Computer Network	6 years
Office Equipment	5 years
Computer Software	6 years
Furniture & fixtures	10 years
Electric Fittings	10 years
Vehicles	8 years

(b) Capital Work-in-Progress and Capital Advances

Cost of Property, Plant and Equipment not ready for intended use, as on the balance sheet date, is shown as a "Capital Work-in-Progress". The Capital Work-in-Progress is stated at cost. Any expenditure in relation to survey and investigation of the properties is carried as Capital Work-in-Progress. Such expenditure is either capitalized as cost of the projects on completion of construction project or the same is expensed in the period in which it is decided to abandon such project. Any advance given towards acquisition of Property, Plants and Equipment outstanding at each balance sheet date is disclosed as "Other Non-Current Assets".

(c) Intangible Assets

Intangible Assets are stated at cost of acquisition net of recoverable taxes, trade discount and rebates less accumulated amortisation/depletion and impairment losses, if any. Such cost includes purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the Intangible Assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Amortization
The amortization expenses on Intangible assets with the finite lives are recognized in the Statement of Profit and Loss. The Company's intangible assets comprises assets with finite useful life which are amortised on a Written down value over the period of their expected useful life.

The amortization period and the amortization method for an intangible asset with finite useful life is reviewed at each financial year end and adjusted prospectively, if appropriate.

1.3.5 Impairment of Non-Financial Assets – Property, Plant and Equipment and Intangible Assets

The Company assesses at each reporting date as to whether there is any indication that any Property, Plant and Equipment and Intangible Assets or group of Assets, called Cash Generating Units (CGU) may be impaired. If any such indication exists, the recoverable amount of an asset or CGU is estimated to determine the extent of impairment, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the CGU to which the asset belongs.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

There are no losses from impairment of assets to be recognized in the financial statements.

1.3.6 Investment Properties

Investment properties (if any), are measured initially at cost, including transaction costs. Subsequent to initial recognition. Items of investment properties are measured at cost less accumulated depreciation/ amortization and accumulated impairment losses. Cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for its intended use. Investment properties are depreciated on straight line method on pro-rata basis at the rates specified therein. Subsequent expenditure including cost of major overhaul and inspection is recognized as an increase in the carrying amount of the asset when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

Long-term investments are stated at cost. Provision for diminution in the value of Long-Term investment is being made only if such decline is of other than temporary in nature in the opinion of management. Current investments are stated at lower of cost or fair value.

Borrowing Costs

Borrowing costs include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

1.3.7 Employee Benefits

(A) Short-Term Employee Benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

(B) Post-Employment Benefits

(i) Defined Contribution Plans

The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

(ii) Defined Benefit Plans

(a) Gratuity Scheme: The Company pays gratuity to the employees who have completed five years of service with the Company at the time of resignation/superannuation. The gratuity is paid @ 15 days basic salary and dearness allowances for every completed year of service as per the Payment of Gratuity Act, 1972. The liability in respect of gratuity and other post-employment benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

Remeasurement gains and losses arising from adjustments and changes in actuarial assumptions are recognised in the period in which they occur in Other Comprehensive Income.

(iii) Other Long - Term Employee Benefits
Entitlement to annual leave is recognized when they accrue to employees.

1.3.8 Revenue Recognition

The Company's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved, in writing, by the parties to the contract, the parties to contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgment.

Fixed-price maintenance revenue is recognized ratably on a straight-line basis when services are performed through an indefinite number of repetitive acts over a specified period. Revenue from fixed-price maintenance contract is recognized ratably using a percentage-of-completion method when the pattern of benefits from the services rendered to the customer and Company's costs to fulfil the contract is not even through the period of the contract because the services are generally discrete in nature and not repetitive. The use of method to recognize the maintenance revenues requires judgment and is based on the promises in the contract and nature of the deliverables.

The Company uses the percentage-of-completion method in accounting for other fixed-price contracts. Use of the percentage-of-completion method requires the Company to determine the actual efforts or costs expended to date as a proportion of the estimated total efforts or costs to be incurred. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgment and is assessed throughout the period of the contract to reflect any changes based on the latest available information.

Provisions for estimated losses, if any, on incomplete contracts are recorded in the period in which such losses become probable based on the estimated efforts or costs to complete the contract.

Dividend Income
Dividend Income is recognised when the Company's right to receive the amount has been established.

Surplus / (Loss) on disposal of Property, Plants and Equipment / Investments
Surplus or loss on disposal of property, plants and equipment or investment is recorded on transfers of title from the Company, and is determined as the difference between the sales price and carrying value of the property, plants and equipment or investments and other incidental expenses.

Other Income
Revenue from other income is recognized on accrual basis.

1.3.9 Foreign Currency Transactions and Translation
Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets which are capitalised as cost of assets.

Non-monetary items that are measured in terms of historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in Other Comprehensive Income or Statement of Profit and Loss are also recognised in Other Comprehensive Income or Statement of Profit and Loss, respectively).

1.3.10 Government Grants and Subsidies

Grants in the nature of subsidies which are non-refundable are recognized as income where there is reasonable assurance that the Company will comply with all the necessary conditions attached to them. Income from grants is recognized on a systematic basis over periods in which the related costs that are intended to be compensated by such grants are recognized.

Refundable government grants are accounted in accordance with the recognition and measurement principle of Ind AS 109, "Financial Instruments". It is recognized as income when there is a reasonable assurance that the Company will comply with all necessary conditions attached to the grants. Income from such benefit is recognized on a systematic basis over the period of the grants during which the Company recognizes interest expense corresponding to such grants.

1.3.11 Financial Instruments – Financial Assets

(A) Initial Recognition and Measurement

All Financial Assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets, which are not at Fair Value Through Profit or Loss, are adjusted to the fair value on initial recognition. Purchase and sale of Financial Assets are recognised using trade date accounting.

(B) Subsequent Measurement

a) Financial Assets measured at Amortised Cost (AC)

A Financial Asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise to cash flows on specified dates that represent solely payments of principal and interest on the principal amount outstanding.

b) Financial Assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

Further, the Company, through an irrevocable election at initial recognition, has measured certain investments in equity instruments at FVTOCI. The Company has made such election on an instrument-by-instrument basis. These equity instruments are neither held for trading nor are contingent consideration recognized under a business

combination. Pursuant to such irrevocable election, subsequent changes in the fair value of such equity instruments are recognized in OCI. However, the Company recognizes dividend income from such instruments in the Statement of Profit and Loss.

c) Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)
A Financial Asset which is not classified in any of the above categories is measured at FVTPL. Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. Changes in business model are made and applied prospectively from the reclassification date which is the first day of immediately next reporting period following the changes in business model in accordance with principles laid down under Ind AS 109 – Financial Instruments.

(C) Investments
Investments are classified in to Current or Non-Current Investments. Investments that are readily realizable and intended to be held for not more than a year from the date of acquisition are classified as Current Investments. All other Investments are classified as Non - Current Investments. However, that part of Non - Current Investments which are expected to be realized within twelve months from the Balance Sheet date is also presented under "Current Investments" under "Current portion of Non-Current Investments" in consonance with Current/Non–Current classification of Schedule - III of the Act.

All the equity investment which covered under the scope of Ind AS 109, "Financial Instruments" is measured at the fair value. Investment in Mutual Fund is measured at fair value through profit and loss (FVTPL). Trading Instruments are measured at fair value through profit and loss (FVTPL).

(D) Investment in Subsidiaries, Associates and Joint Ventures
The Company has accounted for its investments in Subsidiaries, associates and joint venture at cost less impairment loss (if any).

(E) Impairment of Financial Assets
In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of Financial Assets other than those measured at Fair Value Through Profit and Loss (FVTPL).

1.3.12 Financial Instruments – Financial Liabilities

(A) Initial Recognition and Measurement
All Financial Liabilities are recognised at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

(B) Subsequent Measurement

Financial Liabilities are carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

1.3.13 Derivative Financial Instruments and Hedge Accounting

The Company enters into derivative contracts in the nature of forward currency contracts with external parties to hedge its foreign currency risks relating to foreign currency denominated financial assets measured at amortised cost.

The Company formally establishes a hedge relationship between such forward currency contracts ('hedging instrument') and recognised financial assets ('hedged item') through a formal documentation at the inception of the hedge relationship in line with the Company's Risk Management objective and strategy.

The hedge relationship so designated is accounted for in accordance with the accounting principles prescribed for a cash flow hedge under Ind AS 109, 'Financial Instruments'.

Recognition and measurement of cash flow hedge:

The Company strictly uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain forecasted transactions. As per Ind AS 109 - Financial Instruments, foreign currency forward contracts are initially measured at fair value and are re-measured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised in hedge reserve (under reserves and surplus) through other comprehensive income and the ineffective portion is recognised immediately in the statement of profit and loss.

The accumulated gains / losses on the derivatives accounted in hedge reserve are transferred to the statement of profit and loss in the same period in which gains / losses on the underlying item hedged are recognised in the statement of profit and loss.

Derecognition:

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. When hedge accounting is discontinued for a cash flow hedge, the net gain or loss will remain in hedge reserve and be reclassified to the statement of profit and loss in the same period or periods during which the formerly hedged transaction is reported in the statement of profit and loss. If a hedged transaction is no longer expected to occur, the net cumulative gains / losses recognised in hedge reserve is transferred to the statement of

profit and loss.

Fair Value Hedge:
The Company designates derivative contracts or non-derivative Financial Assets/Liabilities as hedging instruments to mitigate the risk of change in fair value of hedged item due to movement in interest rates, foreign exchange rates and commodity prices.

Changes in the fair value of hedging instruments and hedged items that are designated and qualify as fair value hedges are recorded in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to Statement of Profit and Loss over the period of maturity.

1.3.14 Derecognition of Financial Instruments

The Company derecognises a Financial Asset when the contractual rights to the cash flows from the Financial Asset expire or it transfers the Financial Asset and the transfer qualifies for derecognition under Ind AS 109. A Financial liability (or a part of a financial liability) is derecognised from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

1.3.15 Financial Instruments – Offsetting

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

1.3.16 Taxes on Income

The tax expenses for the period comprises of current tax and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income. In which case, the tax is also recognised in Other Comprehensive Income.

(a) Current Tax
Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income Tax authorities, based on tax rates and laws that are enacted at the Balance sheet date.

(b) Deferred Tax
Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

Presentation
The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. In case of deferred tax assets and deferred tax liabilities, the same are offset if the Company has a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

1.3.17 Segment Reporting

Segments are identified having regard to the dominant source and nature of risks and returns and the internal organization and management structure. The company primarily operates in customized and integrated online ERP Software for industries like manufacturing, education, retail, construction, supply chain management (SCM), customer relationship management (CRM), sales force and many more. In view of which the disclosure requirement of segment reporting is not applicable to company.

1.3.18 Research and Development

Revenue expenditure pertaining to research is charged to the Statement of Profit and Loss as and when incurred.
Development costs are capitalised as an intangible asset if it can be demonstrated that the project is expected to generate future economic benefits, it is probable that those future economic benefits will flow to the entity and the costs of the asset can be measured reliably, else it is charged to the Statement of Profit and Loss.

1.3.19 Earnings per Share

Basic earnings per share is calculated by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year adjusted for bonus element in equity share. Diluted earnings per share adjusts the figures used in determination of basic earnings per share to take into account the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as at the beginning of the period unless issued at a later date.

1.3.20 Provisions, Contingent Liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability.

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made.

1.3.21 Events after Reporting Date

Where events occurring after the Balance Sheet date provide evidence of condition that existed at the end of reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the Balance Sheet date of material size or nature are only disclosed.

1.3.22 Non – Current Assets Held For Sales

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and sale is considered highly probable.

A sale is considered as highly probable when decision has been made to sell, assets are available for immediate sale in its present condition, assets are being actively marketed and sale has been agreed or is expected to be concluded within 12 months of the date of classification.

Non-current assets held for sale are neither depreciated nor amortised.

Assets and liabilities classified as held for sale are measured at the lower of their carrying amount and fair value less cost of sale and are presented separately in the Balance Sheet.

1.3.23 Cash Flows Statement

Cash Flows Statements are reported using the method set out in the Ind AS – 7, "Cash Flow Statements", whereby the Net Profit / (Loss) before tax is adjusted for the effects of the transactions of a Non-Cash nature, any deferrals or accrual of past or future operating cash receipts or payments and item of income or expenses associated with

investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

1.3.24 Cash and Cash Equivalents

Cash and cash equivalents comprise of cash on hand, cash at banks, short-term deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

1.4 Critical Accounting Judgments and Key Sources of Estimation Uncertainty:

The preparation of the Company's Financial Statements requires management to make judgment, estimates and assumptions that affect the reported amount of revenue, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in next financial years.

1.4.1 Property Plant and Equipment/ Intangible Assets

Estimates are involved in determining the cost attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the management. Property, Plant and Equipment/Intangible Assets are depreciated/amortised over their estimated useful life, after taking into account estimated residual value. Management reviews the estimated useful life and residual values of the assets annually in order to determine the amount of depreciation/ amortisation to be recorded during any reporting period. The useful life and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation/amortisation for future periods is revised if there are significant changes from previous estimates.

1.4.2 Defined Benefits Obligations

The costs of providing Gratuity and other post-employment benefits are charged to the Statement of Profit and Loss in accordance with Ind AS – 19, "Employee Benefits" over the period during which benefit is derived from the employees' services. It is determined by using the Actuarial Valuation and assessed on the basis of assumptions selected by the management. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These assumptions include salary escalation rate, discount rates, expected rate of return on assets and mortality rates. Due to complexities involved in the valuation and its long term in nature, a defined benefit obligation is highly sensitive to change in these

assumptions. All assumptions are reviewed at each balance sheet date.

1.4.3 Fair value measurements of Financial Instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques, including the discounted cash flow model, which involve various judgments and assumptions.

1.4.4 Recoverability of Trade Receivables

Judgments are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

1.4.5 Provisions

The timing of recognition and quantification of the liability (including litigations) requires the application of judgment to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

1.4.6 Impairment of Financial and Non – Financial Assets

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward-looking estimates at the end of each reporting period.

In case of non-financial assets company estimates asset's recoverable amount, which is higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

1.4.7 Recognition of Deferred Tax Assets and Liabilities

Deferred tax assets and liabilities are recognised for deductible temporary differences and unused tax losses for which there is probability of utilisation against the future taxable profit. The Company uses judgment to determine the amount of deferred tax that can be recognised, based upon the likely timing and the level of future taxable profits and business developments.

1.4.8 Income Tax

The Company's tax jurisdiction is in India. Significant judgments are involved in estimating budgeted profits for the purpose of paying advance tax, determining the income tax provisions, including the amount expected to be paid / recovered for uncertain.

Note -30 - Details of Employee Benefits:

The Company has the following post-employment benefit plans:

A. Defined Contribution Plan

Contribution to defined contribution plan recognised as expense for the year is as under:

The Company offers its employees benefits under defined contribution plans in the form of provident fund. Provident fund cover substantially all regular employees which are on payroll of the company. Both the employees and the Company pay predetermined contributions into the provident fund and approved superannuation fund. The contributions are normally based on a certain proportion of the employee's salary and are recognised in the Statement of Profit and Loss as incurred.

Particulars	For The Year Ended 31st March '25	For The Year Ended 31st March '24	For The Year Ended 31st March '23
Contribution to provident fund and other Fund	6.25	5.42	6.76

B. Defined Benefit Plan - Gratuity:

(i) The Company administers its employees' gratuity scheme unfunded liability. The present value of the liability for the defined benefit plan of gratuity obligation is determined based on actuarial valuation by an independent actuary at the period end, which is calculated using the projected unit credit method, which recognises each year of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

(ii) Gratuity benefits in India are governed by the Payment of Gratuity Act, 1972. The key features are as under

Benefits Offered	15/26* Basic salary* Duration of Past service
Salary Definition	Basic Salary Including Dearness Allowance (if any)
Benefit Ceiling	Benefit Ceiling of Rs 20 Lakhs
Vesting Conditions	5 Years of Continuous Service (Not Applicable In Case of Death/ Disability)
Benefit Eligibility	Upon Death or resignation or Death or retirement
Retirement Age	58 Years

(iii) Characteristics of defined benefit plans and risks associated with them:

Valuation of defined benefit plan are performed on certain basic set of pre-determined assumptions and other regulatory framework which may vary over time. Thus, the Company is exposed to various risks in providing the above benefit plans which are as follows:

Restated Consolidated Notes to the Financial Statements for the Year Ended 31st March '25

A. Actuarial Risk:

It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons:

Adverse Salary Growth Experience:

Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.

Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity Benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cashflow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.

Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity Benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.

B. Investment Risk:

For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter- valuation period.

C. Liquidity Risk:

Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign/retire from the company there can be strain on the cashflows.

D. Market Risk:

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate/government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.

E. Legislative Risk:

Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation/regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognized immediately in the year when any such amendment is effective.

(*) Investment in subsidiaries are measured at cost as per Ind AS 27, "Separate financial statements", and hence not presented here.

(**) Fair value of financial assets and liabilities measured at amortized cost approximates their respective carrying values as the management has assessed that there is no significant movement in factor such as discount rates, interest rates, credit risk from the date of the transition. The fair values are assessed by the management using Level 3 inputs.

(***) The financial instruments measured at FVTPL represents current investments and derivative assets having been valued using level 2 valuation hierarchy.

Fair value hierarchy

The fair value of financial instruments as referred to in note below has been classified into three categories depending on the inputs used in the valuation technique. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities [Level 1 measurements] and lowest priority to unobservable inputs [Level 3 measurements].

The categories used are as follows:

Level 1: Quoted prices for identical instruments in an active market

Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs; and

Level 3: Inputs which are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a net asset value or valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

B. **Market Risk**

Market Risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market Risk comprises three types of Risk: "Interest Rate Risk, Currency Risk and Other Price Risk". Financial instrument affected by the Market Risk includes loans and borrowings in foreign as well as domestic currency, retention money related to capital expenditures, trade and other payables.

C. Credit Risk

Credit risk is the risk that a counterparty fails to discharge its obligation to the Company. The Company's exposure to credit risk is influenced mainly by cash and cash equivalents, trade receivables and other Financial assets measured at amortized cost. The Company continuously monitors defaults of customers and other counterparties and incorporates this information into its credit risk controls.

The Company assesses and manages credit risk based on internal credit rating system. Internal credit rating is performed for each class of financial instruments with different characteristics. The Company assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets. (i) Low credit risk, (ii) Moderate credit risk, (iii) High credit risk.

Based on business environment in which the Company operates, a default on a financial asset is considered when the counter party fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions.

Financial assets (other than trade receivables) that expose the entity to credit risk are managed and categorized as follows:

Basis of categorisation	Asset class exposed to credit	Provision for expected credit loss
Low credit risk	Cash and Cash Equivalents, Other Bank Balances, Loans and Other Financial Assets	12 month expected credit loss.
Moderate credit risk	Other Financial Assets	12 month expected credit loss, unless credit risk has increased significantly since initial recognition, in which case allowance is measured at life time expected credit loss.
High credit risk	Other Financial Assets	Life time expected credit loss (when there is significant deterioration) or specific provision whichever is higher.

Financial assets (other than trade receivables) that expose the entity to credit risk (Gross exposure): –

Based on business environment in which the Company operates, a default on a financial asset is considered when the counter party fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions. Assets are written off when there is no reasonable expectation of recovery, such as a debtor declaring bankruptcy or a litigation decided against the Company. The Company continues to engage with parties whose balances are written off and attempts to enforce repayment. Recoveries made are recognized in statement of profit and loss.

(a) Expected credit losses:
Expected credit loss for trade receivables under simplified approach:
The Company recognizes lifetime expected credit losses on trade receivables & other financial assets using a simplified approach, wherein Company has defined percentage of provision by analyzing historical trend of default based on the criteria defined below and such provision percentage determined have been considered to recognize life time expected credit losses on trade receivables (other than those where default criteria are met in which case the full expected loss against the amount recoverable is provided for). Further, the Company has evaluated recovery of receivables on a case to case basis. No provision on account of expected credit loss model has been considered for related party balances. The Company computes credit loss allowance based on provision matrix. The provision matrix is prepared on historically observed default rate over the expected life of trade receivable and is adjusted for forward - looking estimate.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the entity operates.

KEY FACTORS THAT MAY AFFECT OUR RESULTS OF SERVICES

Our results of services have been, and will be, affected by many factors, some of which are beyond our control. Our results of services and financial conditions are affected by numerous factors including the following:

A. Ability to expand the customer base and develop new products capabilities to meet evolving preferences and generate new sales.

Customer relationships are the core of our business. Our ability to grow our customer base and drive market adoption of our products is affected by the pace at which the educational ERP software industry grows. We expect that our revenue growth will be primarily driven by the pace of adoption of our offerings. This will drive our ability to acquire new customers and increase sales to existing customers, which in turn, will affect our future financial performance.

We have grown our operations by introducing quality services to meet potential requirements of our customers and create market for our services. To service and grow our relationships with our existing customers and to win new customers, we are required to provide them with products that address their quality and other requirements, to anticipate and understand trends in their relevant markets and to continually address their needs as those change and evolve.

Our future growth shall depend on our ability to identify emerging market trends, offer new services coupled with new features to customers, inculcate strong culture of innovation, have trained workforce and latest research and development facilities to enable us to expand the range of our offerings to customers and improve the delivery of our services to increasingly represent our revenue from operations, widened the customer base that we cater to, and typically have a higher margin profile.

B. Sales and Marketing

We have deployed a team of efficient and dedicated marketing professionals for the marketing and promotion of our products. Our marketing team constantly monitors and scours the trends in the market. Regular interaction is required to maintain the client base and to gain insight into the design and specification needs of the diverse clientele. We constantly seek to grow our product reach to underpenetrated geographies, increase the penetration of our products in markets in which we are currently present and widen the portfolio of our products available in those markets by growing our network. Our success is dependent on our ability to enter and expand our network in new markets which is further dependent on our familiarity with the economic condition, customer base and commercial operations in new regions. With limited presence, our ability to gain market share is also dependent on our ability to compete with companies that may have an existing strong presence.

However, we may not be successful in expanding our network or increasing our market presence. Further, we may also face disruptions in selling our services for various reasons such server and cloud disruptions, if we are not able to hire and retain quality work force, natural disasters, absence of professional & technical expertise, etc. which may result in disruptions to our business.

C. Increasing competition in the industry;

We face competition from multiple competitors in the markets in which we operate. Success of our operations depends on our ability to effectively compete, including by continuing to distinguish our brand and products from competition by maintaining our brand perception centered around the values of trust and transparency and by continuing to optimize our product assortment and marketing campaigns to cater to preferences in the markets in which we operate. For further details, see "***Business – Competition***" on page 161.

D. Changes in fiscal, economic, or political conditions in India

Our results of operations are dependent on the overall economic conditions in the markets in which we operate. Any slowdown in these economies, including due to a global economic slowdown or

changes in interest rates, government policies or taxation, social and civil unrest, pandemics and political, economic, or other developments could adversely affect our business and results of operations. Even though there are many factors that affect levels of consumer confidence and spending, demand for jewellery can be relatively inelastic in our markets as it is often purchased for wedding-related, religious, cultural, and sentimental reasons.

KEY PERFORMANCE INDICATORS AND CERTAIN NON-GAAP MEASURES

In evaluating our business, we consider and use certain non-GAAP financial measures and key performance indicators that are presented below as supplemental measures to review and assess our operating performance. The presentation of these non-GAAP financial measures and key performance indicators are not intended to be considered in isolation or as a substitute for the Restated Financial Information. We present these non-GAAP financial measures and key performance indicators because they are used by our management to evaluate our operating performance. These non-GAAP financial measures are not defined under Ind AS and are not presented in accordance with Ind AS. In FY 25, the revenue from operations of our company increased from ₹ 1,034.55 Lakhs to ₹ 1,348.49 Lakhs. For details regarding the increase in revenue of our company in FY 25, please refer to chapter title ***"Management Discussion and Analysis of Financial Condition and Result of Operations - Comparison of Restated Financials for the year ended March 31, 2025, with fiscal year ended March 31, 2024"*** on page 272.

With the increase in the revenue, our company was able to maintain similar PAT increased in FY 25. The expenditure on employee salaries and other welfare expenses, which represents a substantial part of our operational costs, does not change significantly with change in revenue. Moreover, the fixed costs associated with executing projects—such as development hours, project management, server expenses, rent expenses and customer success team involvement—are generally not proportional to the scale of the revenue. Therefore, the cost incurred during executing a lower value project does not increase proportionately while executing a higher value project.

Since the fixed costs don't drastically scale with the revenue (employee costs remain roughly the same), but the revenue increases, the profit margin of our company also increases.

Moreover, the fixed costs associated with executing projects—such as development hours, project management, server expenses, rent expenses and customer success team involvement—are generally not proportional to the scale of the project. Therefore, the cost incurred during executing a lower value project does not increase proportionately while executing a higher value project.

Shrinath Travel Agency & Anr. Vs. Infinity Infoway Pvt Ltd. & Ors [C.S.(COMM) 738/2023]

A civil commercial suit has been registered on 16.10.2023 against our Company and our Group Company, 'Infinity Transoft Solution Private Limited' ("**Defendants**") by M/s Shrinath Travel Agency and Shrinath Travel Agency Private Limited ("**Plaintiffs**") for abetting, enabling, facilitating, supporting, participating in the infringement of trademark, trade dress, passing off, dilution, unfair competition, etc. by the other defendants as the Defendants are actively providing technology services to the other defendant in the said matter in relation to the online use and promotion of their services under trademarks which are deceptively similar to the trademarks of the Plaintiffs. Defendants also maintain the websites of the other defendants on a day-to-day basis and hence, it is contended by the Plaintiffs that the Defendants and other defendants are acting in concert, and the concerted actions of the defendant arise out of the same transaction and/or series of transactions giving rise to a common cause of action.

The Plaintiffs have sought for permanent and mandatory injunction restraining the Defendants from indulging in, abetting, enabling, facilitating, supporting, participating in the act of infringement upon the rights of the Plaintiffs by the other defendants. The Plaintiffs also sought damages for the loss caused to its brand value and reputation as well as punitive and exemplary damages from the Defendants and other defendants for the unjust enrichment by the Defendants by wilfully misusing the proprietary rights of the Plaintiffs. The Plaintiffs have sought an order from the High Court of Delhi for damages of ₹ 2,00,01,000/- by way of damages in favour of the Plaintiffs along with other punitive damages. The parties have entered into a settlement agreement dated December 14, 2023 ("**Settlement Agreement**") and have moved to the Hon'ble High Court of Delhi seeking a consent decree based on the Settlement Agreement.

As the Relevant Defendants were merely providing technology services to the various entities that were using trademarks which were similar to that of the Plaintiffs, (including but not limited to providing domain registration, ticketing, creating, maintaining, websites and mobile applications) and were not directly responsible for trademark infringement as other defendants, the Settlement Agreement does not impose any monetary liability on the Defendants, thus, the Relevant Defendants are not subject to payment of any settlement amount.

However, upon identification and notification of such impugned listings by the Plaintiffs to the Relevant Defendants, as per the terms of Settlement Agreement, the Relevant Defendants have taken down such impugned listings and have agreed to refrain from providing services to any such entities associated with the impugned listing. Relevant Defendants have also agreed to lock, cancel, surrender and or transfer any domains for which they are the registrant, and which are reported by the Plaintiffs. Relevant Defendants have further agreed to be mindful of their due diligence obligations under the uniform Domain Name Dispute Resolution Policy (UDRP), to ensure that the same does not violate the rights of the Plaintiffs and to hold the Plaintiffs, and their affiliates indemnified and harmless against any loss that may arise from breach of such settlement.

As per the order dated 11.09.2024, the Hon'ble High Court of Delhi in the matter of 'Shrinath Travel Agency Vs. Infinity Infoway Pvt Ltd' has taken into record the Settlement Agreement and has ordered to decree the said suit as per the terms of the Settlement Agreement. Further, as per the order dated 13.11.2024 of the Hon'ble High Court of Delhi in the said matter, it has been confirmed that the abovementioned suit has been decreed for Relevant Defendants and right of other defendant nos. 3, 5, 6 & 7 to file a written statement has already been closed. Relevant Defendants have submitted the original copy of the Settlement Agreement, and the court has

relieved the Relevant Defendants from the said matter, however the Relevant Defendants will be removed as parties to the said matter on the next date on hearing. The matter is currently pending for before the Hon'ble High Court of Delhi.

On January 21, 2020, the Respondent entered into a business arrangement with the Complainant to act as an Agent Portal Distributor for its "ClickOnNet Agent Portal" platform, whereby the Respondent was authorised to appoint agents and earn commissions from bus and flight bookings made through the portal. In the course of this relationship, the Complainant extended a credit facility to the Respondent, starting at ₹1,00,000 and increasing periodically. As of December 7, 2020, the total outstanding dues stood at ₹5,00,000. Thereafter, the Respondent made certain part payments towards the outstanding amount, reducing the net dues to ₹3,00,000 by October 2021. To settle this balance, the Respondent issued a cheque dated November 29, 2021, for ₹5,00,000 drawn on Union Bank of India in favour of the Complainant. The cheque was presented for clearance on the same date but was returned unpaid with the remark 'Funds Insufficient' on December 1, 2021. Upon re-deposit on January 17, 2022, the cheque was dishonoured again on January 19, 2022. Despite issuance of legal demand notices

dated January 7, 2022, and February 2, 2022, the Respondent failed to respond or clear the dues. As of January 19, 2022, the total outstanding, including cheque return charges, amounted to ₹3,00,236. the Complainant was consequently compelled to initiate criminal proceedings seeking recovery of the outstanding amount of ₹ 5,00,000/- along with appropriate punishment and interest under the provisions of the NI Act. The matter is currently pending adjudication before the Hon'ble Judicial Magistrate First Class, Rajkot.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment Mechanism, the SEBI UPI Circular have introduced the UPI Mechanism in three phases in the following manner:

- **Phase I**: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Bidder had the option to submit the ASBA Form with any of the designated intermediaries and use his / her UPI ID for the purpose of blocking of funds. Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20/- to ₹ 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bid from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Applied Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
